

Cryptome

10 March 2010

These photos show disintegrated body parts ejected by an aircraft attack on World Trade Center South Tower, New York, NY, 11 September 2001. Photographer unknown.

From the National Institute of Standards and Technology FOIA Release of 3,160 Electronic Records of the WTC Collapse Investigation. Selections from Group 7 Disk 2 of 3.

The photos appear to be scanned from hardcopy and enlarged, presumably for close study by NIST researchers.

The scans are about 20MB each, compressed here, uncropped.
