OBJET:

Robert BERCI - U.F.O. Sighting Calgary, Alta. 3 SEP 73

#### 3 SEP 73

- 1. On this date, Mr. BERCI contacted this office to advise that at approximately 12:00 midnight, he was observing an unidentified flying object through his binoculars from his home address of 201 Springwood Dr. S.W., Calgary. The object he was viewing was directly above the Calgary International Airport. He described it as flat and round in shape, white with green flashes, basically stationary, but waivering and blinking.
- 2. At thistime, the Ministry of Transport Air Traffic Controller on duty, was contacted and he advised that he had nothing showing on his scanning equipment and anything in the sky in that vicinity was not normal air traffic. The members on duty at the time, Cpl. G.M. LAMB and myself, viewed this object in the sky. It is the opinion of the writer that the object was a celestial body, however, it was flickering. Through the naked eye, the object appeared to be the same as any other star out then, except that it varied in intensity. Calgary Telex Message CDET #868 was sent to the National Research Council Meteor Centre, Ottawa.

#### 11 SEP 73

3. This report is late in submission due to the fact that BERCI was unco-operative and wanted to forget the whole matter. After numerous attempts, the following statement was obtained:

STATEMENT OF: Robert BERCI (15 yrs.). Taken at Calgary, Alta., 11 SEP 73, at 10:30 AM

"At approximately 11:30 PM on 3 SEP 73, I was watching the northeast skyline of Calgary in the vicinity of the Calgary International Airport from my home address of 201 Springwood Dr. S.W., Calgary. I viewed an object first through my naked eye and them got a pair of binoculars to get a closer look. It was shaped more or less like a football and basically bright white light. It was hard to tell, but I saw green lights and possibly red flashes. Either the lights were revolving around the object or the whole thing was spinning. I viewed the object for about 15 minutes through the binoculars. The object seemed to move in a southwesterly direction and once in awhile, it would move rapidly transversely. I watched it for about 15 minutes and again at approximately 12:45 AM, I looked for it again, but couldn't find it".

# Re: Jean CUNNINGHAM - U.F.O. Sighting Whitehorse, Y.T. 9 SEPT 73

At 11:25 p.m. Pacific Standard time above date, a call was received from CUNNINGHAM, who was at her home at 1103 Fir St., Porter Creek, a distance of approx. 5½ miles northwest of the detachment office in downtown Whitehorse. She stated that at approx. 10:50 p.m., she had spotted a bright object in the sky moving southward, east of the city. This object hesitated, moved north and then south again. It appeared to be moving quite slowly and at times hovered in one spot. It was last seen, at the time of her call, at what appeared to be a much higher altitude then when first sighted.

CUNNINGHAM reports that the object, when viewed through binoculars, appeared to be cigar shaped with a flame shooting out of one end.

No other sightings were reported, however CUNNINGHAM was in a stable frame of mind and thought to be reliable.

Inquiries were made with the Atmospheric Environment Service and the airport and no explanation could be provided from them.

Telex was dispatched to the National Research Council, Meteor Centre, Ottawa. No further information is available from this point.

DESCRIPTION OF SIGHTING: CIRCULAR IN SHAPE, TOP AND BOTTOM ROUNDED. SIDES WERE FLAT. OBJECT WAS DULL IN COLOUR. FLYING AT VERY LOW ALTITUDE, IN A CIRCULAR OR LOOPED MOVEMENT IN A NORTH-EAST DIRECTION. DURATION OF SIGHTING: 3 TO 4 MINUTES APPROX. OTHER RELEVANT INFO: OBJECT HAD SIX LIGHT ON ITS CIRCUMFERENCE AND THESE WERE OF A BRIGHT WHITE. TWO MORE LIGHT'S WERE ON THE BOTTOM, THESE WERE RED. THE OBJECT CAUGHT BRIDGES ATTENTION BY THE FACT THAT IT WAS FLYING SO LOW AND THAT HE COULD HEAR NO SOUND COMING, FROM IT . AT THE TIME OF THE CONVERSATION WITH BRIDGES, IT WAS NOTED THAT HIS VOICE WAS VEHY SERIOUS AND UPON QUESTIONNING HIM HIS ANSWERS WERE CLEAR AND PRECISE. BRIDGES DID NOT! SOUND AS IF HE WERE FABRICATING A STORY. BRIDGES AVAILABLE FOR QUESTIONNING

Dear Sir:

Re: UFO Report - Edmonton, Alta. Area 29 SEP 73

Complainant Dale GILLESPIE of 11 Royal Road,
Lord Byron Place, Edmonton, Alta., phone 435-4202,
stated that at approximately 6:30 a.m., 29 SEP 73,
MDT he had gotten up to let his dog out and noticed a
red light in the sky west of the City. At the time of
sighting the sky had light cloud. GILLESPIE stated
that he watched this red object in the sky for 10 minutes
with binoculars. This object seemed to be moving
west to north at a great speed, flying high in the
sky only to appear as a reddish light; no shape was
distinguishable. Subject then lost sight of UFO
when it passed behind a branch of a tree.

A check with Industrial and International Airports in Edmonton area revealed that there was one flight that had left the International at approx. 6:45 a.m. heading north, west and southwest, DC-8 to Vancouver, B.C. GILLESPIE stated that he did check his watch at the time of the first sighting and believed the time to be quite accurate. He stated that as far as he knows he was the only person to have seen the UFO. GILLESPIE seemed quite sincere about the sighting and stated that he had first reported it to a local radio station who, in turn, advised him to call the R.C.M.P.

Edmonton Detachment telex #572 was dispatched to NRC Meteor Centre, Info CANFORCEHED COMMISSIONER on 29 SEP 73.

Yours truly,

(RAW) S/Sgt. 1/c Det. (M. W. PHILLIPPE) Cst.

Dear Sir:

Re: Unidentified Flying Object
Near Edmonton, Alta. 6 OCT 73

Attached please find photostat copies of telex message pertaining to information submitted regarding U.F.O. sighting on 6 OCT 73 near South City limits of Edmonton, Alberta. Kathy SHANAHAN of 10825 - 86 Ave., Edmonton, Alta. reported the sighting and appears to be a reliable person. She is approximately 22 years of age and a University student. She was accompanied by her husband, Craig, who corroborated circumstances as given. Craig SHANAHAN is 26 years of age and employed by Air Canada as a Passenger Agent at the Edmonton International Airport. Subject appears to be a reliable person and advises he had contacted the Control Tower at the International Airport and has ascertained that no aircraft had landed during the time of the sighting nor was anything observed on their radar screen.

Another person witnessing this U.F.O. was Mr. R. I. BROUGHTON of Ellerslie, Alta. BROUGHTON was contacted and felt this object was a plastic balloon, however, could not state what had caused it to move. BROUGHTON was very hesitant to offer any information and when questioned could not reply with any degree of intelligence. No further particulars available.

Yours truly,

w) sysgt.

Sighting of unidentified flying objects - Nipawin & Carrot River Dist's. 30 SEP 73

# 9 OCT 73 5:00 pm

N73/099

- Above date and time Mr. Donald GROSSLAND (B 18 APR 48) of Carrot River Sask., came to the office and reported that he had seen several unidentified flying objects between 9:30 pm 30 SEP & 12:30 am 1 OCT 73 in the Nipawin and Carrot River Dist's Sask.
- He stated that Don BOUE and two female companions were driving around in the country, when they observed three objects with a greenish red glow, hovering approx 8 to 10 feet above the ground. These objects were revolving and approx. four feet in diameter. GROSSLAND stated that as they took off from their parking spot, they were followed for approx. 5 miles at which time the objects gained altitude and disappeared into the night.
- In further questioning Mr. GROSSLAND it was learned that he does not wish to identify his female companions. He admitted to drinking some beer while he was parked observing these strange objects. I asked him why he had waited to report this matter until the 9 OCT, to which he replied that people think he is crazy for seeing such nonsense. Telex message #CRVR-15 was sent to Nat. Research Council in Ottawa Ont.

10 DEC 73

4. Efforts to locate Don BOUE have failed to date. It was learned that he has moved to B.C. leaving no forewarding address. GROSSLAND is also not living in Carrot River, and his whereabouts cannot be established.

BY DAVE ANDERSON.

There are more than a few problems in believing recent ecounts that we are being visouter apace.

For one thing it presumes there is life elsewhere smart enough to build spaceships to get here, but dumb enough to hink it's important to come.

REMEMBER VOUR eighth grade whence tracher who hold you that if the earth were s pea and the moon a grain of talt the sun would be a bankethall down the block?

was right. And what he didn't tell you was that the rearest star other than the sun would be represented by a fat tudy in Alice Springs, Aus

Beyond that it's unlikely the fat lady would have any plan-ets in her arbit capable of supporting life. They would likely be too het or too cold: Scientista do believe there are planeta with intelligent life on them, but the nearest one is scobably 100 to 1,000 light on went like Egitting it could still take you hundreds years to get there. Put simply, the distances be-

the stars are so vair here not now, and probably

BUT FROM watching TV and reading science fiction many people have come to bestars is sort of like traveling to the moon: You simply pack a few oxygen tanks and peatur butter sandwiches and politely ask Mr. Spock to accelerate to Warp I.

The reason they used such a meaningless term as "whrp" to describe speed on Star Trek was probably to save the show's science adviser from being carted off to the laugh-

ing ocademy.
Albert Einstein, a noted Swim ex-patent office clerk and mathematician, becamefarmous when he discovered the last word in speed limbs. It's 600,600,000 miles an hour. Nothing except light goes that fast.

object's spend increases to does its weight and so does the mount of energy required to

Objects, he they rocket hips, speeding bullets or Democrats sprinting through Grouse Pointe, cannot reach a sport of 689,600,000 mp.h. besucce it would take an infinite amount of energy to get them ning that-fast.
Even a 60-billion-volt atomic

screlerator can only get a single electron up to about 99.9 percent the speed of light. And on electron is so light-weight that if the lat lady in Australia were a grain of falt her toe naif clippings would weigh as much as thousands of elec-

even a peanut butter sandwich up to half the speed of light would require an unspeakable amount of energy. A whole spacecraft would take conoderably more.

Our moon rockets only hit about 26,000 m.p.h. That is zago zero aero cero four (.0006) percent the speed of

Even in the event that some-one managed to stuff a star-the size of our sun into an eversized seltzer bottle to get enough horsepower to hit half the speed of light, it would still take them between 200 and 2,-000 years to get here.

If they really have arrived here this week they have been a long time coming, Imagine their disappointment. Generations of them-if they live a normal carbon-based organic fe span as we do-have lived and died in space patiently assing on their culture and

Perhaps the dead were recyed to fertilize the self-con-med life support system. /they haven't developed relatively small life support stem they probably had to ring almost the entire atmosere and food supply of their uset with them.

BUT SUPPOSE again that by did it, that some paycho-othic civilization managed to arness, the energy of four or suns and taunched a col-the size of Keokuk, lows, ch has spent 300 years consuming surrogate peanut butthrough space at 12,000 turns the speed of the Apollo command module.

Then they had to somehow allo, this fetched-from-star

monatronity into our solar sys-

Getting even a peanut butter sandwich up to half the speed of light would require an unspeakable amount of energy.

### LIKE A GIANT SPOTLIGHT

# Police, Railmen See Flashing UFO

BY BILL MICHELMORE

Two Detroit policemen and five central Michigan trainmen were on the job 50 miles apart when they looked up into the sky at 6:30 a.m. Sunday and said they saw huge spherical objects with flashing lights hovering above them.

Police officers Preston McBride and Charles Lain of the 12th Precinct were patroling near Marygrove College at Six Mile and Wyoming when they said they saw a sphere-shaped UFO hovering over the schoolgrounds.

"There were two white flashing lights at first and then a third bright light came on followed by a flashing red light," they re-ported to their commanding officer.

They said the object hovered for about five minutes before speeding off towards the

southwest. The officers could not be reached Sunday

for further comment. A 12th Precinct spokesman described the two officers as "very reliable."

AT ABOUT THE same time as the Detroit sighting, the crew of an Ana Arbor Railroad freight train heading from Toledo to Owosso said they had the fright of their lives as they neared Dundee.

"All of a sudden there was this great big light in the sky," said a shaken brakeman, Thomas Manke, 20, of Owosso. "It was like a giant spotlight and hovered about 400 feet up just off to one side of the train."

Manke said they radioed the nearest train

tower operator about five miles away "and he looked out and saw it too."

Manke was quick to add: "This is no hoax. We'd take a lie detector test-on this.

Manke said the UFO "was as big as a medium-sized house."

As the train moved closer to the hovering UFO Manke said the bright light went out "but there still was four red blinking lights, and then it took off in a northeasterly direction. I've never seen anything move so fast in my life."

It had hovered overhead for about seven minutes, he said.

At one point train conductor Dennis Mc-Kanich went out into the back platform of the stationary train to get a closer look.

"The lights were so bright he couldn't look at it," Manke related. "It scared the hell out of him. He ran back inside locked the door and grabbed a coal poker.

"I'm not saying this is a flying saucer, but it wasn't a helicopter or an airplane or a balloon or anything like that."

# Part-Time Job Has New Status

NEW YORK - The parttime job: Once it was the stepchild of industry, the house-wife's panacea for boredom, the breadwinner's source of supplemental income. Now, by wirtue of a slow but steady revolution, the permanent (but less than 35-hour-a-week) position is beginning to achieve the status of career,

rter

rip from an Indi-t. In con-

rive pack-nd a Hertz mited mi-

vould cost

w York to a contrast,

ort trans-

other ex-

ald appro-

· For mothers, it offers the means of keeping a hand in the professional pie without

sacrificing the family.

· For recent college graduates, it is an escape hatch from the 9-to-5 trap.

• For corporations, which are under pressure to implement affirmative action programs, it provides a magnet for talented females.

 For some government officials, it is a potent weapon against discrimination in employment.

· For trend watchers, it significa . A change in society's values.

In 1962, 5,1 million Ameri-cans worked at year-round, less-than-35-hour-a-week; jobs. in in 1972, the latest year for which the Bureau of Labor Statistics has compiled data, those ranks had burgeoned to 6.5 million. "And women accounted for 80 percent of that increase," said Samuel Ehren-halt, th Labor Department's deputy assistant regional director for labor matistics.

WHILE THE employment of part-time workers clearly is more than a poble experiment, it is still far from being an entrenched practice.

Large segments of industry,

including the top five compa-nies in the Fortune 500 Hst, adamantly resist bending their policies. Along with countless other business, they maintain that the need for continuity and the pressure of production deadlines mitigate against short shifts.

On the other hand, a grow-ing number of companies are beginning to study claims by advocates of the part-time schedule that it offers savings in salaries and fringe benefits, fuller utilization of machinery and a larger pool of talent from which to draw. An added lure is the contention that the part-time worker provides greater productivity

has benefited from the restructuring. "We get solid, capable working people who stay with us on a career basis whom we would never have found otherwise," he said.

retirement rules for foundry workers.

Even if accord is reached on a national contract, there will be a strike at the Michigan Casting Center if health and safety issues are not resolved in local bargaining, Bannon said.

The plant's 5,000 employes turn out engine blocks, steering gear cases and other castings. A walkout would seriously cripple Ford production and idle many of the firm's 185,000 hourly employes.

The UAW earlier this week charged that "flameouts". from the six electric arc furnaces have burned 75 workers in the past year and that there have been 100 such mini-explosions in the past six months.

THERE WERE meetings Friday and Saturday at the foundry to discuss these and other problems with representatives present from the firm that built the furnaces, the Swindell-Dressler Co. of Pittsburgh. ..

Bannon said the UAW "most certainly" will strike the casting center if the problems are not solved.

He said there had been no meaningful progress in the plant, level discussions and that he will meet Sunday with local level officers who have participated in the casting center talks. "It's a shame," Bannon

said, "but for us to do nothing about it is shirking our responsibility." National contract talks also

are scheduled Sunday.

Arts Money OKd WASHINGTON -(A P)-

President Nixon has signed a bill authorizing \$597 milion for the National Foundation on the Arts and the Humanities for the next three fiscal years.

says that such sightings are real only in the sense that a rainbow is real.

Menzel was an adviser to the Ar Force on Blue Book but unlikde Hynek, whom he knows and respects, Menzel concurred in the decision to cancel the project.

"I have come to the conclusion that UFOs are nothing but natural phenomena, usually seen either under unusual conditions or seen by people who do not know how to

recognize what they are seeing," he says.

Menzel has identified more than 100 natural phenomena which can produce the illusion of a flying object. They range from air inversions, in which cold air is trapped beneath layers of warmer air and distorts the images of heavenly bodies, to bad eyesight, which he believes is a factor in many UFO sightings.

"A few months ago, Venus, in the western sky, was very brilliant," Menzel says. "I was in Australia at the ime, and it was widely reported as a UFO. Once it gets in the press. lots of people go out, and they all see it."

Ice crystals in the atmosphere can create what is. called asundog effect. The ice chystals reflect false images of the sun or moon.

"This produces a peculiar, silvery object, with reddish tinge on the inside that makes it appear fire is shooting out." Menzel says. "Even the moon itself, especially when seen through some haze, has been reported as a UFo."

THEN THERE are the hoaxes, such as the report of a landing of a flying saucer in California's Death Valley in the late 1940s. Prospectors Buck Fitzgerald and Maze Garney said they chased two spacemen, neither more than two feet tall, but lost them in the dunes.

From Mexico, a b o u t the same time, came the report of a shepherd who had found six b a d l y burned bodies, each about 21/2 feet tall, in the wreckage of a silvery saucer in the Sierra Madre Mountains.

And Atlanta pranksters once shaved a monkey and cut off its tail, then claimed they ran over it with their truck before it could scamper aboard a departing saucer parked on the highway.

. All were hoaxes. In the year's of investigation by scientists and laymen alike, not one bolt or rivet from an extraterrestrial spacecraft has ever been found.

## Are UFOs Fact or Illusion?

#### Continued from Page 3A

when the obviously shaken Hickson and Parker told their tale later that night.

Hickson and Parker were separated and questioned inditidually. The deputies could not shake their stories. Then the pair were placed in a cell togetner, while the deputies tape-recorded their conversation with a concealed microphone. Parker began praying.

"If they're lying," Ryder said later, "they oughta be in Hollywood."

Dr. James Harder of the University of California at Berkeley, who assisted Hynek In examining the two men, believes their story.

"There is a good deal of supportive evidence," he says.

There were three other UFO sightings in the Pascagoula area that same night, but more important, Harder says, was the reaction of the two men under hypnosis. Their terror could not have been feigned, he says,

"If they had hallucinated,"
he says "it would be most
remarkable if they had the
same hallucination."

HARDER IS not a scientist. He teaches hydraulic engineering. But he has been pursuing UFO investigations for about 10 years as consultant to the Aerial Phenomena Research Organization (APRO) of Tucson, Ariz, best known of the nation's private UFO groups.

Dr. Hynek was scientific consultant to the Air Force from 1947 to 1969 in its famous Project Blue Book investigation of UFOs.

After spending 22 years investigating 12,618 UFO sightings, the Air Force concluded there was no justification for further study and closed its files in 1969.

Hynek disagrees with that decision and regards the Air Force investigations as shallow. Writing in the June issue of Science Digest, Hynek sand that even the more bizarre reports, in which a figure is reported aboard or near the UFO, cannot be disregarded.

"They are too numerous," he wrote,

Hynek recommends establishing an institute, staffed by interested scientists, to study UFOs.

Currently there are only informal UFO organizations, such as the non-profit APRO, which has been chasing down UFO reports since 1952.

APRO has a small permanent staff, plus 489 volunteer investigators, such as professor Harder, who research the approximately 1,000 reports received each year at the Tucson headquarters.

Mrs. Coral Lorenzen, APRO secretary-treasurer and wife of the organization's founder, James Lorenzen, keeps a log of all UFO reports that appear valid.

THE CURRENT [ ] a p, as
UFO buffs call a flurry of
sightings, began Aug. 31, when
UFOs we re reported in four
south Georgia towns — Wayeross, Camilla, Albany and
Leesburg—and in nearby Phenix City, Ala.

Between then and Oct. 5, APRO logged 56 reports of UFOs, all but a few of them in the South. Mrs. Lorenzen says that, if anything, the sightings have increased since Oct. 5 but that she and her staff simply have been to busy to log them.

The most celebrated has been the Pascagoula incident. But Louisiana sheriff's deputies have told of chasing flying objects with their squad cars. Indiana farmers have reported strange lights following them home, and the governor of Ohio, John Gilligan, said he saw a UFO on a visit to Michigan last week.

Gilligan's report was only one of numerous sightings in Michigan. The Detroit police received 24 calls reporting UFOs last Sunday night alone.

Twelve-year-old Beth Tyson and her brother, Dean, 10, watched from their yard on the near east side as what looked to them like a meteor shower crossed overhead.

Then both noticed other lights in the sky behaving peculiarly. Beth saw what looked like an oversized star "move, then stop, then move again.", A red light would dim, then "brighten up like a flash."

That same evening, around sunset, Alvin and Persis Hayden watched a copper-colored UFO all the way from Port Huron to Mt.Clemens as they drove along 1-94. Mrs. Hayden described the object as wedge shaped, with one side slightly rounded. But she said it would phase out, then reappear as a dot of light, grow gradually to a sphere, then assume its original form again.

"It was so close," she said.

## UFO Plot Thickens: Photos Awaited, Gardener Missing

The world must wait for photographic verification of the UFO sighting Thursday night in western Michigan until Manistee County Sheriff's Deputy John Giel-czyk geta his pictures back from the deugstore.

"That won't be for several days," said a spokes-man for the sheriff's department Saturday.

GIELCZYK IS one of four deputies who say they

a squadron of UFOs three times the size of jumbs jets apped around over the Manistee County Airport.

New sightings were reported early Saturday north of Maniatee in Benzie County, but no member of the Benzie County Sheriff's Department was able to possessely confirm the sightings.

One report involved a space ship this hovered over an automobile abortly after har-closing thme, according to a spekerman for the department.

Meanwhile, Mrs. Thomas K. Fisher of Detroit said Saturday that the strange disappearance two weeks ago of her gardener from a vacation property near Manistee could conceivably have involved extra-terrestrial "foul play."

Reports from the Manistee County Sheriff's De-partment and the Manistee State Police post indicate that Mrs. Fisher's gardener, Frank Skipski, 54, of Manistee, disappeared about two weeks ago. Police

however,

Mrs. Fisher said she had decided that UFOs were not out of the picture after "putting two and two to gether."

In an apparently related development, the Free Press was unable to confirm reports Saturday that a man who lives in the words near Manistre in a bouse full of computers had exceeded actual conversations of UFO crows passing over his property.

# UFOs: Hoax, Illusion-or Real Thing?

The writings of Livy describe what may have been sightings of unidentified flying of . jects by the Romans in 218 B.C., and some scientists believe that the prophet Ezekiel's vision of wheels within wheels was a UFO

But the modern era of UFOs began with a businessman and pilot from Bosse, Idaho; named Kenneth Arpold, who reported seeing

nine saucer-like objects flying in formation on the slopes of Mr. Rainier in Washington. state on June 24, 1947.

SINCE THEN, there have been an esti-mated 50,000 to 100,000 reports of disks, globes and other wingless craft seen bovering, spinning, drifting and streaking at un-heard-of-speeds across the skies, usually silently, performing manbuvers that no known arreraft could manage and that no human pilot could survive.

and a worldwide media; audience has de-voired fantastic reports which a 1987 Gal-lup poll showed an assounding 46 percent of Americans believed.

None of the stories has been more bizarre than the report from Pascagoula on the Mis-sissippe Gulf coast that two shipyard workers were taken abourd a strange craft on Oct. It by what appeared to be robots.

"These men had a very real experience," says Dr. J. Allen Hynes, chairman of the department of astronomy at Northwestern University and one of the ablion's leading authorities on UFOs. "There is absolutely no or that a hour was perpetrated on them."

He urged that the two men, Charles Hickson, 4), and Galvin Parker Jr., 19, not be ridiculed. After examining them while they were under lygnosis, Hynek said their terros-was real. for his pen conclusion about what ac-

tually happened in Pascagoula, Hynek seid: "I wouldn't nen attempt an explanation at Mils time."

THIS IS THE men's own story, as related them to a Pascagoula newsman, Murphy Givens:

While fishing at night in the Pascagoula River, only I few blocks from the downtown business carriet, the two men heard what Hickson destribed as "a zipping sound."

ground a glowing, oval-shaped craft about 6 feet high and 8 to 18 feet wide.

Three forms came dritting out. They were about 3 feet high, greyish, wrinkled, with claustine hands and what the two fishermen took to be a head with pointed ears and nose and an opening where a mouth would be. There were no eyes, as such, only small slits above the nose. One figure emitted a soft buzzing sound.

A feeling of weightlessness came over Hickors and Parker as, soon as they were touched on the aboulders by the creatures. and they find the sensation of drifting upward neward an opening in the craft.

That is the last thing Parker recalls, but lickson remained conscious. He was floated mus a separate compartment from Parker, and lay suspended a foot or two above the floor. As a hipbuilder, Hickson was struck to the absence of manns, rivers or corners of any kind. There was no furniture, and no light fustures, although the interior was brightly lighted.

A free-flusting ball, somewhat amaller that a neskethall, rayved about his body as if photographing him; then the hovering figares glided him out.

As soon as the two fishermen were on the ground, the craft was gone in an instant.

TWO DISBELLEVING sheriff's deputies. Glenn Syder and Barney Mathia, laughed

RE. OBJET:	Unidentified Flyin		

- 1. In compliance with our instructions re: CO-NRC, Paragraph 7, the following report is being submitted for the information of the Upper Atmosphere Research Section, National Research Council.
- At 12:20 PM, November 7, 1973, this office was contacted by Barbara Alice (Mrs. Oris) REYNOLDS, Gabriel Road, R.R.#2, Falmouth, Hants Co., N.S., who stated that she had observed a U.F.O. at approximately 7:10 P.M., A.S.T., on November 6, 1973, supposedly flying above Falmouth district in Hants County. Mrs. REYNOLDS was interviewed and she stated the object was first sighted by her 12-year old son, at which time the object was stationary at an altitude of appreximately 100 feet and one-quarter mile from their residence. The object was also witnessed by Mrs. REYNOLDS' other two children, ages 10 and 8 years, and also by Mr. and Mrs. Curtis SANFORD, Falmouth, N.S., who are Mrs. REYNOLDS' in-laws and who were contacted by Mrs. REYNOLDS after she had viewed the U.F.O. herself.
- The sky was very clear at the time of the sighting and the U.F.O. has been described as being oval shaped, similar to a bathtub, with two reddish coloured lights shining downwards. These lights changed brightness in that as one light got dimmer, the other became brighter. The size of the object has been placed at approximately five feet in diameter, however this is without the aid of binoculars or telescope. Its height could not be approximated by the persons viewing same. The object remained stationary for approximately 20 minutes and then travelled in a northeasterly direction a distance of about three miles towards Avondale, Hants County, and then returned in a southwesterly direction back towards Windsor. It remained stationary for just a few minutes and then proceeded in a southwesterly direction and continued till they lost sight of it. There was no sound from the object, however as it moved it appeared to emit a light green glow. This is the first time any of the observers have sighted an object of this nature and all appear to be reliable witnesses
- A check was made with various business firms in this area to see if a helicopter or light plane may have been in the area at the time. All proved negative. No further sightings of this nature have been reported to this office.
- 5. Copy of this report is being forwarded direct to the Astrophysics Branch, Upper Atmosphere Research Section, National Research Council, Ottawa, Ontario, KIA ORS.

Concluded Here.

# POINT BEACH NEWS PLANT NEWS PLANT NISCORIAN ELECTRIC POWER COMPANY PISCORIAN HOPER COMPANY

NONTH NONTH 15 KEWAWEE COUNT NUCLUME PLT

### Trout Hit at Point Beach

April 23 dawned cloudy and rainy but that was fine for fishing off Point Beach Nuclear Plant. The usual crowd of anglers assembled on the company-but fishing platform and soon were hauling in sizeable rainbow, brown and brook tout-One asticified group (left) heads back to shore after a successful morning. Officiety opsined Merch 7, the partorn (below) extends 150 feet to the end of the Unit I discharge flumo.

Kaukauna resident-Al Wegand shows off the huge 33% inch, 16% pound rainbow trout he caught off the company platform March 29 during a snow storm. He also pulled in the nine pound rainbow. (Kaukauna Times photo)

### Point Beach Nuclear Plant Passes 5 Billion Kilowatt-hour Mark

THE first 497,000 kilowatt unit at Point Beach Nociear Plant reached a total production of five billion kilowatt-hours at 3:54 p.m. on April 27. The mark was set well ahead of original expectations.

That amount of power would serve the needs of 500,000 average residential customers for a year and a half in the service areas of Wisconsin Electric and Wisconsin Michigan. Unit 1 first began producing power in November 1970 and was placed in commercial, operation on December 21, 1970.

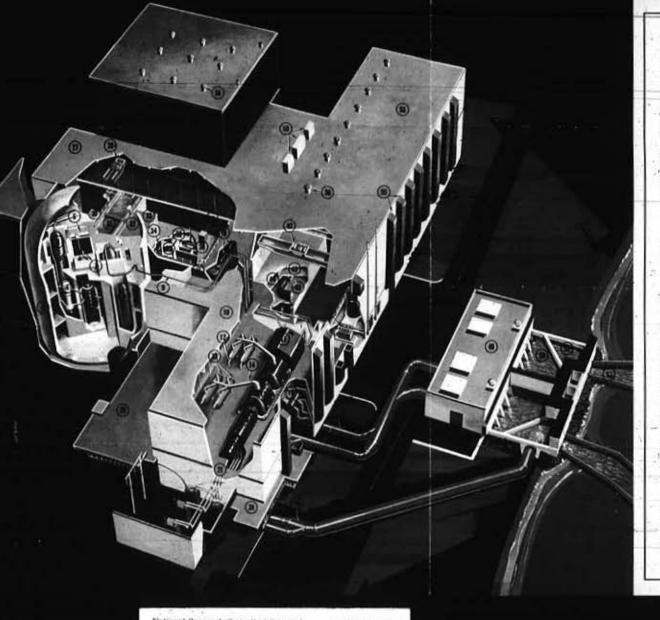

President John G. Quale said the unit provided about one-fourth of total system generation during the 18-month period. He said the plant was still operating on its first loading of fuel. "Barring unforseen problems, the unit will continue to produce power until refueling is required pext October." Quale said the five billion mark was reached with "no measurable adverse environmental effects."

A second 497,000 kilowatt unit which was completed early last fall, and later loaded with fuel, still awaits an operating license from the Atomic Energy Commission. Licensing has been indefinitely delayed by intervention, prolonged hearings and several court decisions which affected licensing procedures.

Unit 1 set its first billion kilowatt-hour mark March 31, 1971, and passed the three billion total on October 25 of last year. Its availability for service has been nearly 88%.

Quale added that nuclear power conserves other fuel resources. To provide the equivalent amount of power at one of the largest units at Oak Creek power plant south of Milwaukee would have required the burning of four billion pounds of coal.

While the companies are contributing to research into even more promising methods of power generation such as breeder-reactors and fusion, Quale stressed that the present-day nuclear technology is a vast improvement over previous methods. "It is based on solid scientific and engineering development and enjoys an unsurpassed safety record," Quale said.

N73/1387

ON November 9, 1973, the following report was given to CC. on the telephone:

Date: July 6, 1973

Time: 23:40 EDT

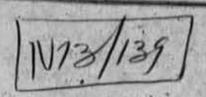

Place: At a cottage, near Pembroke.

Observer: Mrs. Brandwood,

13, Centerpark Dr.,

Ottawa, Ontario.

Observation: A steady orange light about 200 to 300 ft from the ground, came toward the observers then went away. The large object was the size of a 70%, and there was 2 smaller disks. As the object left, they disappeared very rapidly. There were 4 witnesses. The sighting lasted 5 to 7 nmin.

On November 9, 1973, the following, report was given over the telephone to CC.

Date: 4 to 5 yrs ago, in mthe summertime, in the evening. Observer: Mr. Feller,

200 Rideau Terrace, Apt 1308, Ottawa, Ontario.

Observation: At the time, Mr Feller was living at 52 Springfield.

Drive. He was out for a walk when he saw something like a flash which light up the area. It had a spinning top, like a twirl.

It lasted 3 sec.

N13/140

On November 9, 1973, the following report was given over the telephone to CC.:

Date: Nov. 9, 1973

Time: 04:00 AM. EST

Place: Ottawa, Ontario.

Observer: Name withheld by request.

Observation: An object, high in the sky, which looked like
the size of an airplane, was all light up. It was going from the
East to the West. It was moving very fast. The observer had seen
it 2 days ago going from the West to the East. Lasted either 5 min.
or 5 sec. ( not sure ).

Allen Russell WAMBOLT (BD. 3 JUL 42)
U.F.O. Sighting

Lincoln, Sunbury Co., N.B. 11 NOV 73.

### 11 NOV 73

- 1. At 9:10 P.M. this date Mrs. Jane (Allen Russell) WAMBOLT, Lot #5, Robbin Village Trailer Court, Lincoln, Sunbury Co., N.B., called the Fredericton Airport tower and advised she was seeing vapour trails and flashing white lights, possibly wing tip lights, but didn't know for sure. She further advised that the object which she believed to be a plane in distress was headed towards Moncton. The object disappeared within two to three minutes. Mrs. WAMBOLT was advised at that time that there was a DC-9 departing runway 15, but Mrs. WAMBOLT advised she heard the jet and felt it wasn't the same one in question.
- Cst. Fred SHAW, Airport Constable at the Fredericton Airport advised this office of the aforegoing.
- I made an immediate patrol to Robbin Village with Cst. SHAW. Upon arriving at the residence of Allen Russell WAMBOLT I interviewed Mrs. Jane (Allen Russell) WAMBOLT, Allen Russell WAMBOLT, and Donald Jefferson HALL. I was advised that all three persons had viewed the spectacle from outside their residence. All three were unanimous on their description of the object.
- At 9:10 P.M. the 11 NOV 73, the sky was clear. The WAMBOLTS' and Mr. HALL were outside their trailer located at Robbin Village, Lincoln, Sunbury Co., N.B., when they noticed a white vapour trail (one) and heard no sound from an object very high in the sky. They could not make out a shape of the object. They saw the object for 3 to 5 minutes going from west to east at a fast rate of speed. There were two lights like neon lights, bright white on the object. The lights were flashing together maybe 4, 5, or 6 times, paused and then 4, 5, or 6 more flashes. During the pauses they saw a small red light like a cigarette lighter on what appeared to be the right hand side of the object.
- A check was made by CST. SHAW at the Fredericton Airport for other transport passing at that time but none were reported. WAMBOLT is an E.L.M. Technician at C.F.B. Gagetown and felt to have a better than average knowledge of aeronautical transport. He is felt to be a very reliable witness to such an incident. It was his belief that an air transport vehicle was in distress, however, he could not identify such an aircraft with this sort of flashing pattern. All persons concerned are felt to have seen something unknown at this time.

N13/153

On November 19, 1973, the following report was given to CC. on the telephone:

Date: November 18, 1973

Time: O8:00 pm EST

Location: Dining Room of the Skyline Hotel, Ottawa.

Observer: Mr. Steacy & family.

Observation: Direction SE.5 to 6 lights - 4 cabin lights, merged into 1 very bright light, which stayed there for 1 min. Then it

reversed its direction and went away from where it came from.

The airport was 40° from the sighting.

N13/154

On November 21, 1973, the following report was given over the telephone to CC:

Time: 10:30 PM EST.

Date: Nov. 20, 1973

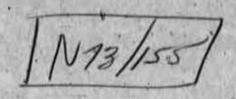

Location: Ottawa.

Observer: Mrs. Bird,

1485 Caldwell Ave.,

Ottawa, Ontario.

Observation: From the fifth floor of her appartment building, she saw between Carlington ski-hill and the parking lot, a round yellow light, low over the city. It looked like a large star. The light moved upward then to the right and got bigger and bigger. It became red like fire and lasted 3 min. Then it got small again and went away.

On November 20, 1973, the following report was given on the telephone to CC:

Date: October 8, 1973

Time: O9:30 PM EDT

Location: On NCC property, behind Carlington Ski-hill.

Observer: Mrs. Bird,

1485 Cardwell Ave.,

Ottawa, Ont.

Observation: A flashing light was sitting on top of a tree.

It then moved slowly over the ski-hill. It was a blinding
flashing light. In between the flashes, one could see
window with blue light. The object was made of white aluminum
at the front.

It lested 3 to 4 min.

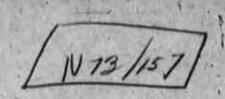

[ N/3//sc/

On November 22, 1973, the following report was given over the telephone to Meteor Centre:

Date: Nov. 21, 1973
Time: 05:30 PM EST.
Location: Ottawa, Ontario.
Observer: Mrs. Bird,
1485 Caldwell Ave.,
Ottawa, Ontario.

Observation: A small round white object with 2 red lights at back came over Carlington Ski-hill toward the city, The red light got bigger. It went upward, then return in the direction it came from. It lasted 2 min.

(Ke) DAK WEST HE BEET TO THE SERVICE OF THE SERVIC

On November 22, 1973; the following report was given on the telephone to Meteor Centre:

Date: November 21, 1973
Time: O6:20 PM RST.
Location: Ottawa, Ontario.
Observer: Mrs. Bird,
1485 Caldwell Ave.,
Ottawa, Ontario.

Observation: A light came floating over the city. It came over the building then went very slowly overhead. It was coming! from the east and made a U-turn over the building and went back. It lasted 2 min. It was the shape of a hat; it had little red lights.

ROYAL CANADIAN MOUNTED POLICE - GENDARMERIE ROYALE DU CANADA REF. DOSSIERS GRC OTHER FILE REFERENCES u Du 30 Nav.73 TE 18 18 SUB-DIVISION - SOUS-DIVISION 73-400-32 Winnipeg DETACHMENT - DÉTACHEMENT Thunder Bay RE: OBJET: Mr. and Mrs. Herbert Henry GILIMAN, 449 Heather Crescent, Thunder Bay, Ont., Sighting of U.F.O. - 24 Nov. 73

1. On 27 Nov. 73, Mrs. Herbert Henry GILIMAN contacted this office and advised that she and her husband had sighted an U.F.O. on 24-11-73, while at their summer cottage at Shebandowan, Ontario.

In compliance with OP MAN CO-AIR, the following information was received.

(a) 24-11-73, 9:30 p.m. E.S.T. (b) Scattered Clouds

(c) Mr. and Mrs. Herbert Henry GILIMAN, 449 Heather Crescent, Thunder Bay F, Ont. Tel. No. 622-1054

d) Middle Lake Shebandowan, Hagey Township, Ontario

No other witnesses

- (f) Unable to make out shape due to extreme brightness of object which was hovering vertically then sideways over lake. Redder than orange colour, larger and brighter than a star. UFO approximately 1/2 to 1 mile from observers
- (g) 9:30 p.m. to 9:50 p.m. (h) When object finally disappeared, it went in a southerly direction over lake. Both persons quite certain of sighting.

### 29-11-73

On above date, Mrs. GILIMAN was interviewed. She could add nothing to information already provided, and stated that as Shebandowan is primarily a summer resort area, it is unlikely that there were other witnesses, as most of the cottages are closed for the winter.

Mr. and Mrs. GILIMAN are known to be reliable citizens and I found them quite sincere in reporting this sighting.

Unless otherwise instructed, this file will be shown as noted hereunder.

YOUR NO.

OUR NO. 73-400-19

INDVIK SUB-DIVSION

/ N 73/160

Fort Good Hope, N.W.T. 30 NOV 73.

Upper Atmosphere Research Section, Astrophysics Branch, National Research Council, Ottawa Ontario. KIA OR8

Dear Sirs:

On the morning of 25 NOV 73, at approximately 5:00 amNoel KAKFWI (BD. 21 DEC 16) of Fort Good Hope, happened to be looking
in a westerly direction from his residence when he saw an object
discribed as follows. About one mile away and at 1000 foot altitude,
he saw what appeared to be fifteen or sixteen red balloons tied in line
one behind the other, not bright just illuminated and about fifteen feet
in diameter. There was no sound of any type at anytime. They appeared
to be moving away from him at a slow rate loosing altitude as they progressed. KAKFWI watched the UFO's for several minutes and then called
Gorgina KAKFWI (wife) and Tommy KAKFWI (son), both were interviewed and
advised that they saw a red circle in the west but due to the temperature did not observe the UFO for any length of time.

KAKFWI then called on some neighbours and they too observed the red object. The neighbours were interviewed and advised that they saw a red object in the westerly skys but that by this time it looked similar to a star. KAKFWI then moved to a different location on the river bank about two hundred yerds away and advised that when he reached this point the objects had disappeared from sight, it had been observed for about 20-25 minutes.

Noel KAKFWI had been sleeping and woke to have something to eat when he happened to go out side, he was not intoxicated and there is no reason not to believe the sighting. Gorgina and Tommy KAKFWI had both been sleeping and were awakened to go out in the cold. The neighbours had been partying and their observations would be limited.

There has been no previous sightings of this type in the area. M.O.T. advised that there was no aircraft or weather balloons in the area at this time. If further information is required please contact this detachment.

(R.A. BUNN) #22180. 1/c Good Hope Det.

## ROYAL CANADIAN MOUNTED POLICE - GENDARMERIE ROYALE DU CANADA

DIVISION DATE OF DESCRIPTION OF THE REFERENCES OF THE DESCRIPTION OF THE REFERENCES OF THE DESCRIPTION OF THE DESCRIPTION

UNIDENTIFIED FLYING OBJECT - Sighted at Glerwood, North. Co., N.B.

- 22 NOVEMBER 73

The following is in reference to our Radiogram
No. 73/247 dated 23 NOV 73.

2. On 22 MOV 73, Cpl. KEEN of the Canadian Forces Base, Chatham, N.B. called and stated that he had received a phone call from an Ex-Servicemen who told him that his son had seen an U.F.O. near their residence at the captionally noted location. KEEN stated that the caller did not wish to have his name divulged, however, gave his phone number as a state. I asked the caller if there had been any aircraft in the air prior to his call and KEEN stated that there had been a helicopter, however, it had landed sometime before receiving the phone call. Checks were made with the Moncton Airport and their radar failed to detect any aircraft in the seppen of their radar at the time of the presumed sighting which was approximately 7:15 - 7:20 P.M.

I called telephone number and explained to the gentlemen that we would need some information for record purposes. He stated his name was the part of that we could visit his residence and interview his son. It who had seen the U.F.O. At 9:30 P.M. I met with the part of the part of age, and he stated that he had seen the object from his back yard.

Stated that he had seen a set of lights, two red and two green and one white light which was revolving and looked like a search light. The stated that he had observed this object for approximately two minutes after which time it went out of sight in the vicinity of the abandoned Glemwood School. Further to this, he stated there was no noise being emitted from the object and that it was flying at an altitude of approximately twice the height of trees. The was unable to give any information pertaining to this object's shape and colour. Atmospheric condition in the vicinity of the sighting was misty with a light mist falling.

seemed to be taking was that of a North-easterly course going from behind his residence on the west side of highway 11 diagonally across to behind the Glenwood School.

5. On 23 MOV 73, I visited the area behind the Glenwood School. Mr. Merton DICKSON, owner of the School and who resides in a mobile trailer behind the School, stated that he had heard two extremely loud thumps sometime between

- CONTINUED ON PAGE TWO -

7530-21-029-4527

#### UNIDERTIFIED FIXING OBJECT

# COMPTRUED FROM PAGE ONE

DIGEROW paid no perticular extention to these thumps as he thought they were caused by a truck going over a busp on highway 11 a few foot from his home. After telling DIGEROW my reason for being at his residence and describing to him the supposed course of the U.F.O., he seemed to be more sure that the sound had come from the North side of his trailer which he felt was unusual as two busps in the road were directly in front of his residence and not North of his residence on highway 11. DIGEROW and I seemethed the area where the U.F.O. seemed to disappear from antically's view without finding any trace of any forwign object or sircraft having crashed or landed. This area behind the residence is wooded with evergreen trees which seem to be approximately 30 - 40 feet in height and behind these trees is a large open seempy area.

excited and seared of the consequences of seeing this object, however, I am confident that he did see an object of unknown origin or possibly a helicopter from C.F.B. Chatham, N.B. doing reder approaches and possibly counter blade rotations.

7. I contacted Cpl. KEEN and we both feel that what the observer saw was, indeed, a helicopter approaching the Base, however, this cannot be conclusive as the records at C.F.B. Chatham, H.B. show that the helicopters landed prior to the sighting.

8. This report is being submitted as per 0.H. CO-MRC, Para. 7 and a copy of same will be forwarded direct to:

Unidentified Flying Object Starblanket, Okanese, Peepeekisis and Balcarres District, Sask. 27 NOV 73

## 27 NOV 73

- 1. At 8:30 P.M. the above date Noel STAR, Chief of the Stanblanket Indian Reserve, reported that at 7:40 P.M. he saw what he believed to be a U.F.O. in the area of Fred STAR's residence on the Peepeekisis Indian Reserve. He advised that the object he saw was large estimated to be 150 feet in diameter and flying very fast. STAR added that it appeared to be red and orange in colour. STAR further stated that he saw this object in an open field behind STAR's house and he knows for a fact there are no buildings in that area.
- Cst. BRISCOE and Cst. HOEL to scene and I was also advised. Noted members drove to this area and met Fred STAR who advised that he personally didn't see anything but Jimmy and Dorothy STAR had seen something and were north on the grid trying to locate it. Cst. BRISCOE and Cst. HOEL drove along the grid and came upon Jim and Dorothy STAR who advised that they had also seen a strange object minutes before their arrival. They claimed the object was moving very fast and they said it was red and orange in colour. It was apparently west of the grid at this time. Cst. HOEL and Cst. BRISCOE then drove north on the grid, then west on the 10 mile road however. failed to see anything which resembled this object. 'An odd set of lights west of #310 Hwy., attracted their attention and patrol was made to the grid west of the highway. They drove approx. 4 miles down this grid when they saw the lights to the south west and they appeared as described above. To affect a closer look they drove to the Lipton Grid another 4 miles south and then another four miles west on this grid. At this location they could see the object again. and it appeared to be no more than a mile away to the south west. They observed this object for approx. I hour when it lifted to an estimated altitude of 100 feet and moved towards them. At this time they could see a clear out line of the object that being a mushroom. shape with red and orange coloured lights encasing it completely. The object then stopped and seemed to back track to where they first observed it. . Cst. HICKMAN and the E.M.O. team attended the scene with approx. 15 snow machines and they attempted to get close to the object for observation. As the machines approached the object it moved further away to the south west. For approx. two hours members noted on page one and various civilians present from the E.M.O. team observed the object and its actions. I was also present with a high power scope and numerous individuals had a good look at the object. The object was moving further away as time passed so Cst. HOEL and Cst. BRISCOE drove to #10 Hwy., where they again saw the object however it was moving very fast to the south east and shortly disappeared from sight.

Telex Bal 31 dispatched and National Research Council advised. Dept. of Transport also made aware of the situation at the outset since it was thought the possibility of a small aircraft having trouble existed. There were no small aircraft or foreign objects reported on radar.

Radar site telephoned and requested particulars of the CFB Yorkton

on the 28th NOV 73 Cst. HICKMAN and myself searched the area in the Starblanket and Okanese Indian Reserves were the object had been first reported however nothing was found. All the witnesses in this particular case are considered reliable persons. As a matter of interest the Band Administrator Fred STAR advised that on the night on the 29th of November 1973 this same object was back in the Reserve area and was also observed by Jimmy STAR and other persons on the reserve.

CONCLUDED HERE:

i/c Balcarres Detachment

At approximately 8:30 P.M., 27 NOV 73, Noel STAR, Chief of the Starblanket Reserve reported to Cst. HOEL and the writer that at 7:40 P.M. this same date he saw what he described as a U.F.O. in the area of the Peepeekisis Indian Reserve, STAR stated he saw a large object with red and orange lights approx. 100 feet from the ground in the area of Fred STAR's residence on the Peepeekisis. From there STAR felt the object went north towards the Okenese I.R. in the area of Dorthy STARS. STAR then stated he thought the object moved south back toward Fred STAR's residence. Cst. HOEL and myself immediately drove to the Peepeekisis I.R. where we spoke to Fred STAR'who indicated that Jimmy STAR and Dorthy STAR had gone to look for the object apparently seeing it earlier. Cst. HOEL and myself drove north on the grid where Jimmy STAR and a carload of kids and Dorthy STAR were stopped. STAR stated they had seen the object again a few minutes before our arrival and at this time it was west of the grid in an open field. They could not give any distance but claimed it moved very fast and was red and orange in colour. The noted members then proceeded through farm yards and along the 10 mile road failing to see any sign of this object. From here we drove across #310 Hwy. in the direction of some odd lights west of #310 Hwy. , the grid. Approx. 4 miles down the grid we observed an object in the southwest displaying red and orange lights. To affect a better look, we drove to the Lipton grid another 4 miles south on #310 Hwy. In approx. the same position we saw this object which appeared to be approx. I mile away. The lights were distict and very bright at this time. stood on the road with the lights of the PC out and watched the object move up and down. The lights went from bright to dim nearly fading completely. Suddenly the object appeared to be moving in our direction and lifting from the ground. I would estimate it to be approx. mile away and approx. 100 feet off the ground. At this time I saw a clear outline of the shape of the object that being mushroom shaped and lights covered it from one side to the other. I would also estimate the size to be approx. 150 feet in diameter and I could not hear any sound from this object. Cst. HICKMAN and the EMO team attended and searched the area with skidoos. Cpll ARMSTRONG advised and attended. As the object appeared to be moving away from the skidoos Cst. HOEL and myself drove to #10 Hwy. and followed the object visually southeast until it disappeared from sight.

RG 77, Vol. 307

STATEMENT OF CST. A.B. HOEL - Fort Qu'Appelle Detachment 28 NOV 73 1:00 A.M.

At approximately 8:30 P.M., 27 NOV 73, along patrol with Cst. BRISCOE, Balcarres Detachment we received a complaint from one Noel STAR who advised that he had sighted a U.F.O. down near Fred STAR's place. Cst. BRISCOE and myself' patroled to the area and after checking the area out we sighted an orange coloured light in the sky some distance away from us. It appeared to be about 100 feet off the ground and was a bright orange at this time and as we watched it, it appeared to fade and disappear altogether. The next time we noticed it, the bright orange light was on the ground and as we watched it changed from orange to a red . We proceeded to try and get closer to the object and we drove down on a back road and lost sight of it. The next time we saw it, it was red coloured and it appeared to be bobbing up and down like a yo-yo. Prior to this Cpl. ARMSTRONG and Cst. HICKMAN advised of the sighting and Cst. HICKMAN proceeded to round up the E.M.O. group and made arrangements to have them brought out to the area with their skidoos. Cst. BRISCOE and myself drove down the road to where the object had appeared and as we approached with our head lights on the object disappeared. Next time we saw the object was on the Lipton grid. This time we watched it for approximately half an hour as the object appeared to be playing tag in the farmers field would raise off the ground approximatly 100 feet and rage back and forth through the air all the time the bright lights becoming brighter and dimer. The lights this time appeared to be bright red and also an orange. It started to move sideways and suddenly turned and came straight towards where we were standing. The objects at its closest time to us appeared to be approximately. mile from us. It looked to be in the neighbourhood of 100 feet in diameter and with the appearance of an upside down saucer. The lights burning across the top and a light at each corner. The lights on the side appeared red. No noise of any kind came from the object. Suddenly it stopped approaching us and it went back in the direction that it came from. It went back to the area that it had been in previously approximately a mile from us and played around in the fields some more. At this time I proceeded to walked down the road trying to get closer to where it was. I sighted the object as I walked down into the valley. After I had gone down into the valley Cst. HICKMAN and his E.M.O. term arrived at the scene and the lights from the cars appeared to drive the object further back Cst. HICKMAN and the E.M.O. people head into the field. out on skidoos to where the object was stationed in the field. They had a good look at the object through the scope on Cpl. ARMSTRONG'S rifle. It appeared to have port holes. Cst. HICKMAN and his voluntaries approached the object but it appeared to take off away from them and the further they went the further the object went. Seeming to stay just ahead to them. Cst. BRISCOE and myself went back to #310 hwy. and back around it to try and interWe lost sight of the object and the next time we saw it was on the south rise and it appeared to be moving up and down just above the horizen and in a latitudinal direction. The object would climb and then drop appearing as if it was hedge chopping. Cst. BRISCOE and myself headed back to #10 hwy to try and get around the object. We lost sight of it and the next time we saw it was in the Abernethy district. As there are no roads into this area we could not get any closer to it. The last we saw of the object it was heading towards the Manitoba boarder at the high rate of speed. I might also add that Cpl. ARMSTRONG and Cst. HICKMAN as well as the E.M.O. workers also witnessed the object that was at the scene at the Lipton grid.

Signed: Cst. A.B. Hoel

REOBJET:

Hrs. Guy ROUX - U.F.O. seen by, Bathurst, Glou. Co., N.B. - (7 Dec 73).

N /3/175

# 8 Dec 73

On above date, C/N called this office stating that on the A.M. of 7 Dec 73 at approximately 2.30A.M. she had seen what she described as a U.F.O. The sighting was made from her residence. The object in question was described as being cigar shaped with two light coloured spots on the front. Mrs. ROUX stated that the object became lighter as she looked at it, and described it as being larger than the moon. Altitude appeared to be approximately 1500 ft. and object appeared to be moving very alow. The sky was clear and visibility good at the time of the sighting. Sighting was for approximately 10 mins. and object disappeared travelling from east to west.

- 2. No other reported sightings were made to this office and a check with the Bathurst C.P. also proved negative. C.F.B. Chatham has been contacted and advised that no sircraft were in this area on the day and time in question. Our telex 349 was dispatched.
- She is a well respected lady in the city. Her husband, Gut ROUI is a doctor in the city. Copy of this report forwarded direct to the Upper atmosphere Research Section, astrophysics Branch, Mational Research Council, Ottawa, Ontario, KIA ors.

"CONCLUDED HERE"

I.J.M. Cpl. I/C Bethurst Det.

(W.B. HENEIGAR) 23822. Bethurst Detachment.

1V73/16

On December 10, 1973, the following report was given over the telephone to Meteor Centre:

Date: December 7, 1973

Time: 21:10 
Place: Fontaine Bldg. West Side. (9th floor)

Observation: Dr. Roberts-Pichette, Tel: 7-1618

Liaison and Coordination Directorate,

Planning and Finance Service,

Department of the Environment,

Ottawa, Ontario,

KIA OH3

Observation: 2 lights were seen in the northerly sky. the larger was saucer shaped and twice the size of an aircraft. The smaller one disappeared almost instantly. there was another one more to the west. It got larger then after 20 min, moved West. When it started to move it became elongated and 1 times the size of an aircraft. It was in the red part of the sky. (subset) All lights were yellow. At 21:50 another red light appeared. It stayed the same lenght (4 tymes the size of an aircraft). It stayed stationary for over 30 min. then became small like a dot.

Report of an Identified Flying Object (IFO) which led to a number of UFO and comet reports from other observers.

Sighted by: A.G. McNamara (and members of his car pool),
Senior Research Officer,
National Research Council.

Location:

Ottawa.

Time:

7 Dec., 1973, 16:35 - 16:50 E.S.T.

Event:

When leaving the NRC Bldg. M-SO parking lot at 16:35 EST, a high-flying jet plane was observed in the zenith trailing a moderately short contrail. .It was flying nearly due west in clear skies just after sunset, and was too high for its engine sounds to be audible. As we drove west on the Queensway towards Ottawa we were able to observe continuously the aircraft's progress. It quickly passed into a region above the shadow line and the contrail looked like a brilliant orange fan or comet in the sky. I remarked then to the other passengers in the car that this aircraft contrail would probably generate a number of comet or UFO reports. After about 10 minutes, the contrail was low in the west, and resembled a nearly stationary, orange, oval due to the perspective. Some 15 minutes after first sighting the aircraft at Bldg. M-50, we turned off Alta Vista Drive and it was hidden from view. At this time the jet's contrail was probably 100 - 150 miles away and still clearly visible as a bright orange blob against the sunset 'sky.

[N73/17]

On December 11, 1973, the following report was given by telephone to Meteor Centre:

Date: December 7, 1973

Time 21:00 3

Place: Place Vincent Massey, Hull, P.Q.

Observer: Mr. Vernon

Depatment of Environment.

Observation: He saw an object which was stationary and looked like a con trail of an airplane in SW sky. It was catching the rays of the setting sun. 2 other objects were low in the sky.

The one on tip looked like a comet and the other looked like a small dot. It lasted more than 30 min.

RE: OBJET:

Carl NICHOLSON -Sighting of U.F.O. Upper Lawrencetown, Hfx. Co., N.S. 6 JAN 74

At approximately 12:30 a.m., A.S. time, captionally noted subject advised this office that he had seen what appeared to be a U.F.O. in the sky a short distance from his residence. He also advised that it had been in the sky for the past hour and he had been observing it for the duration.

- 2. Subsequently, a check was made with both CFB Shearwater and Halifax International Airport controller, but they advised that nothing was known, or had been reported to them, about this.
- Jeon arrival at the scene a short time later by the writer, the U.F.O. had, according to NICHOLSON, landed and could not be seen. As a result of this NICHOLSON was interviewed and it was learned from him that he was babysitting at his parents' house and at about 11:30 p.m., he heard his dog barking outside, therefore, he got up to investigate and upon looking out the window of his residence, he noticed a U.F.O. in the sky. NICHOLSON, it should be pointed out here, is 15 years of age and apparently the only person known to have sighted the object. He related that after observing the object for about one hour, he then decided to call our office after observing the object land. During the hour of which he observed same, he noticed the craft hover, move across the skyline, and then finally land. The approximate distance from the residence to the craft at the time it landed would have been approximately two to three miles and it landed in a wooded area. NICHOLSON could not give a description as to the shape of the object only that it had four coloured lights situated horizontally across the object and the colours were blue, yellow, green and red. Also, prior to landing, a large white light came on beneath the coloured lights. Altitude at the time of sighting was above the treeline and not too high. Condition of the sky was partly cloudy and visibility excellent as it was a bright moonlight night. No other objects were seen at this time by NICHOLSON. Prior to the arrival at the scene by the patrol, NICHOLSON did not see the craft leave the area after it had landed, nor during the time the investigation was conducted.

Reliability of the witness is unknown. However, he appeared quite sincere in his facts concerning the matter. Our message number 1 has already been forwarded to the NRC, Ottawa, Ontario. In view of the above, unless otherwise instructed, no further action required this point.

Statement of (BD: 13 MAY 16)
Taken R.C.M.Police Office, 4:00 PA - 12 JAN 74.

.1.

At approximately 5:45 AM on the 6th of January 74, I walked to the living room and as I passed the picture window I noticed a strange light about 30 feet above the ground coming toward the house from the west. It was coming straight east. It was dark and the sky was clear at the time. The object was a very bright light at first. As it came closer I began to see the form of an object. seemed that I metted the object at approximately one half a mile away and within 15 to 20 seconds it was approximately 150 feet from the house. The object was above some willow trees approximately 20 to 30 feet off the ground. The ground and the trees were illuminated just like in daylight. The object was oval in shape like a squash ball. The object was approximately 30 to 40 feet in diameter and about 15 to 20 feet in height. There was a dome on top from \$ feet to 6 feet in diameter and 2 high. It seemed like the dome was transparent. The body of the object was shiny bright silver. I seen four exhaust at the center of the object from 4 inches to 6 inches each in diameter in a single row approximately 1 foot apart. I can't tell on which side the exhaust pipes were as I couldn't say if the machine spun on its axel. I don't know if the machine stopped above the willows but all of a sudden it changed direction and travelled from going east to south west. As it was pulling away it was losing its altitude. When it went away there was flames coming out from the exhaust. The flames were all colours, yellow-orange with some blue. The flames were shooting 10 to 12 feet behind. I last noticed the object as it went down under the tree line. I figured it was landing: I partially dressed up and went for the car. I drove out of the yard and up the road. When I passed the tree line I could see it standing still on 244 highway. I can't say if it was right on the highway or a few feet above it. I travelled up to the municipal road to Provincial Road #244 which is approximately 1,000 feet from my yard. I turned toward the object which was sitting approximately i mile south on PR244. There wasn't any flames coming out of the exhaust just a very bright white light coming from the dome on top. It wasn't like a search light, just a bright light illuminating the surrounding up to 50 feet around the ship. I travelled approximately 200 feet south at approximately 20 MPH and then I noticed flames all around and the ship lifted right up for approximately 60 feet and then took off south west. In approximately 12 to 15 seconds it was the size of a bright star. A few seconds later it disappeared. I went back 3th hours later at daylight to the spot where the object had landed but there wasn't any tracks on the highway. The temperature at the time was very cold, approximately

On the 10 JAN 74, I was advised by different sources in Notre Dame de Lourdes, Manitoba, that one of Rathwell. Manitoba had noticed a U.F.O. near his place a rew days earlier. I Contacted by phone to ascertain the information and the subject advised that he had in fact seen a flying object in the sky on the morning of the 6 JAN 74.

Immediate patrol was made to the residence, where details of the sighting were collected and immediately forwarded to the National Research Council Meteor Center, Ottawa, via telex.

On the 12 JAN 74. came into our office and a detailed and self explanatory statement was obtained from him. Statement attached hereto. From perusal of the statement it is noted that on the morning of the 7th JAN 74, at 5:45 AN. noticed a very bright light in the sky from the picture window of his residence. He stated that the light was comming toward his place from the east, and within 15 to 20 seconds the object was sitting at approx. 150 feet from his place above some willow trees, approximately 20 to 30 feets from the ground. The described the object as follow: oval in shape, approx. 30 to 40 feet in diameter and 15 to 20 feet in heighth with a transparent dome on the top. The object had 4 exhaust pipes of approximately 4 to 6 inches in diameter around its middle. The body of the object being a bright silver colour. After only a few seconds the object changed course and took a south westerly direction. advised that the object was throwing flames from the exhaust pipes that were. approximately 10 to 12 feet long. The object then landed to the south west of the residence. The then got partially dressed and drove out to the Provincial Road #244 where he beleived the flying object had landed. When object had landed. When arrived at the junction of the municipal Road and Provincial Road #244, he noticed that the object was standing on or near the road at approx. 's mile south of where he was standing, and at approx. 12 mile south of the Junction of Provincial Trunk Highway #2, and Provincial Road #244. And advised the dome on the top of the space craft was illuminated at the time. advised that the had travelled toward the object for approx. 200 feet when he noticed exhaust pipes being iit, and the object lifted right up for approx. 60 feet and then took off south west. Subject advised that the object was of the size of a bright star within 12 to 15 seconds. He attended this point, where he felt the craft had landed 31 hours later but saw no signs of this.

is consistent in his narration of what he saw on the morning of the 6 JAN 74. The subject is beleived to be truthful in his affirmation.

On January 14, 1974, the following report was given over the telephone to Meteor Centre:

Date: January 4, 1974

Time: 20:002

Plce: Snow Road, Ontario ( 100 mi. west of Ottawa)

Observer: Roy Sproyle,

Snow Road, Ontarios

Observation: Mr. Sproyle was in the woods on his property cutting wood. He stopped his chain saw. Then he heard a noise and saw an object 6 ft wide,

12 ft. long and 3 ft deep. Its shape was that of a life raft, green in color, with 2 propellers on top, one at each end. there was no wind, nor identification on the object. It was moving at about 30 to 35 m.p.h. It was lower that tree top level.

N74/006

Le 17 janvier 1974, ce rapport a été transmis par téléphone au centre de recherches sur les météores et les météorites.

Date: Le 14 janvier 1974

Heure: 02:00Z

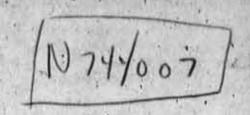

Lieu: Touraine, P.Q.

Observateur: Mme Paré,

11-Boulogne,

Touraine, P.Q.

Observation: L'objet parti du sud-est pour se rendre au sud-ouest en 30 secondes. Cet objet reste à l'ouest toute le reste de la nuit.Cet objet "flash "blanc, bleu, rouge, mais lorsque stationnaire elle est comme une étoile avec un reflet plutôt orange, et un reflet rouge autour. Cet objet semble se camoufler parmi les autres étoiles.

On January 24, 1974, the following report was phoned to Meteor Centre:

Date: January 24, 1974

Time: 17:30%

Place: corner of Gilmour and Bank, Ottawa, Canada.

Observer: Claire POtvin

420 Gilmour Apt. 108 Ottawa, Ontario.

Observation: A kite-shaped black object was moving from SE. to N. It lasted 5 min.

JUFO CENTRE

Radie and Electrical Engineering Division National Research Council Ottawa

Dear Sir:

On Jan.2/74, at about 3:45 P.M. I saw a UFO. I was about to go outside and so I first looked out the window to the west, just to see what the weather was like. At about a 35; angle to the ground, going east, I saw what looked like a meteor. As I continued to watch it, it went higher in the sky and darkened in colour. I ran to the house to get my camera and took one picture when it still looked like a shining mass and one more about a minute later, when it darkened in colour.

It was flying east and seemed to be going higher in the sky. When it got to be about a 90° angle with the earth it was no longer visable. While the object was visable our dog, which never goes in the house, went in and refused to go back out. I can't say why he did this unless the sound of the object was hurting his ears even if we couldn't hear it.

The total time the object was visable was about 4 minutes at the longest.

I am inclosing the negatives of both pictures (no. 12 and 11) on condition that I have them returned. I also would like to know what the object is, no matter what the object turns out to be. You can reach me at 306 342 4546 Glaslyn, Sask. during the hours of 4:00P.M. till about 12:00.

Send Keply to:

Miss Frances Michael

Miss F. Michnik, Box 141, Glaslyn, Sask, SOM 0Y0

Dear Miss Michnik:

Please excuse the delay in replying to your questions about the photographic film which you sent to us. We had to send it out to have enlargements made for preliminary examination, and then look at the original film under a microscope.

Your description of the object in your letter of 28 January, 1974 fits exactly that of a vapour trail from a high-flying jet aircraft flying from west-to-east. At great altitude, only the vapour trail will be visible, illuminated by the sun. (It is quite possible that a dog could hear the aircraft since a dog has much greater hearing sensitivity at the high end of the spectrum.) I am enclosing a copy of a report high I put on record myself in December 1973. This was an aircraft contrail which I saw, and which I was certain would lead to many erroneous reports of a UFO or of comet Kohoutek. Exactly as anticipated, we had several reports come in the next day reporting it as a UFO and comet.

Examination of your film under a microscope shows nothing unusual. Frame No. 11 has a gouge or film defect near the top-centre which makes an odd looking spot on a print made from it. Frame No. 12 has a very faint, diffuse, greenish spot near the centre of the picture, above the roof of the central shed. In a color print, this would show up as a faint reddish or orange spot on the print, and it is probably the contrail which I think you observed.

Tare'

I am returning your film strip to you with this letter. Thank you for sending it to us for examination.

Yours truly,

· With

A.G. McNamara, Head, Upper Atmosphere Research Section.

Dear Sir:

Re: U.F.O. Sighting McCord Dst., Saskatchewan

At 8:20 AM CST on Friday 8 FEB, 74 a report was made to this office by Mr. Donald DAVIDSON of McCord Dst., Sask. that he was presently watching an object in the South Eastern sky that he did not feel was a star. This object had been in the East on first sighting and had now moved to the South East.

- A patrol was made to the DAVIDSON residence which is located 12 Miles South West of McCord. DAVIDSON advised that he became aware of this object when his neighbor Hugh BRAWLEY had phoned him and told him of its presence. The object had gone behind the clouds upon my arrival at the sighting location. DAVIDSON advised that he had observed this object through field glasses and it had appeared oblong with a cone shaped object descending from the bottom. However his wife who had also observed the object through field glasses stated that she felt that it was more circular. They both agreed that the object had been a luminus white colour. DAVIDSON had been advised of the object at 7:45 AM and had made his last sighting at 9:00 AM.
- BRAWLEY was also interviewed and stated that he had seen the object first at 7:00 AM. BRAWLEY lives 12 Miles North of DAVIDSON. BRAVLEY advised that the object was directly Fast of his residence and appeared to be sitting on the horizon. The object had risen in four stages and remained still for approx. 20 minutes before ascending to the South East. BRAWLEY did not observe the object through field glasses but stated that it was small and a white luminous colour.
- 4. Richard COUTURE, Ferland was contacted as he drives the school bus in this area at this time of morning. COUTURE stated that he had seen the object at 7:20 AM when he was a Mile East of McCord. The object to him appeared to be a bright light in the South East.
- All three persons mentioned above are known to this member and are of a reliable nature.

Yours truly

February 8, 1974

1259 Woodeden Dr. Port Credit, Ontario

Thank you for your letter of January h with the observation of Commut Kohoutek and the orange-red object. I think you were one of the lucky ones really to see the comet. Certainly ou have indicated its location correctly in your drawing.

have received quite a horde of reports of things which people saw in the sky the past couple of months while they were hunting for the comet.

I will send your report to Dr. Feter N. Millman of Mational Research Council, Ottawa. Dr. Millman is an international authority on events in the earth's atmosphere. He may have some opinion on what you saw.

Sincerely yours,

Dr. Helen Hogg

1259 Woodeaen Dr Port Credit Jan 4

Dear Dr Hogg.

I cannot believe that I am the only.

person to have seen Kohoutek the night of Jan 4
as it whipped round the sun but after reading all
the available reports I have still to read one
that matches mine.

From the vantage of my rooftop, after 5 pm, Jan 4, I saw a red flare in he sky. A few minutes earlier, a jet and its red-orange contrail had appeared in the same spot and for a minute I thought it was Kohoutek. The second flare, however, had an object within its orange-red corona which I could see with the eye. Inspection with binoculars revealed the details which I specify in my drawing.

Sincerely

Stan Long

February 15, 1974.

Mr. Stan Long, 1259 Woodeden Drive, Port Credit, Ontario.

Dear Mr. Long:

Thank you for your observation of a poculiar object on January 4, 1974. I cannot be sure of what this was but I suspect it was some variation of a contrail from an aircraft; there were many visible that night in the early evening and the colours you describe fit very well with this description. I don't believe this object could have been Conet Kohoutek. I observed the comet on 6 nights out of 10 during that period and never felt sure I had seen it with the naked eye as it was extremely faint. The only colours seen in the comet were the blue-white tomes and these are confirmed by colour photographs which I secured. We have plused your observation on file so that it can be compared with others. The position you plotted for the comet is a long way from where it actually was. On the night you made the observation, the comet was much closer to Venus and Jupiter.

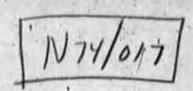

Sincerely yours,

Poter M. Millson.

National Research Council of Canada/ Conseil national de recherches du Canada

RG 77, Vol. 307

Le 19 février 1974, le rapport suivant fut donné par téléphone au centre de recherches sur les météores et les météorites du Conseil national de recherche:

Nom: Ronald Louisseize Rockland, Ontario

Heure: 02 45%

Date: Le 14 fevrier, 1974

Endroit: '3 mi. à l'ouest de Clarence C reek, Ontario.

Description: L'observateur etait en motoneige dans he bois avec 6 autres témoins. Ils ont vu une lumière blanche suspendu (Search light). Tout a coup la lumière se dirige vers le témoin; la lumière a une telle densité que la neige apparaît blanche. Puis la lumière disparaît et une machine passe a environ 100 pieds au-dessus avec 4 lumières, une jaune, une verte, une bleue et une rouge qui forme une carré de 40 pieds carré. Le ciel était nuageux. Cette chose ne faisait aucun bruit. Elle se dirigeait

a une vitesse de 5 mi. à l'heure vers l'ouest.

N74/018

Le 19 Tévrier, 1974, le rapport suivant fut transmis par téléphone au centre des études sur les météores et les météorites:

Date: Le 14 février, 1974

Heurer 04:30 Z

Endroit: Mi- chemin entre Curran et Bourget, Ontario, allant vers Bourget.

Observateur: Mme Hélène Turgeon 103 Dagmar, Vanier, Ontario.

Description: Elle a vu une grosse lumière blanche et à lumières rouge fixe. La lumière blanche etait sur le côté de l'objet. Aucune limière clignotante. L'objet etait immobile, puis a traversé le chemin, alors que la lumière etait eteinte. Cet objet a passé de droite à gauche très lentemant, à hauteur fixe. Lorsque la lumière s'est rallumé l'objet se dirigeait vers un bois. La durée totale fur d'environ 7 min. Il ni avait aucun bruit. L'auto filait très lentement. Le témoin n'a pas quitté l'auto durant l'observation.

Dear Sirs.

at approx 6. am today edt. I worked my way out of sack, three hours before my normal 2.45 am wake up. as i didnt set my clock radio. ( no work today) SO I WALKED INTO BACK BEDROOM AND OPENED SHADE SOMEWHAT SLIGHTLY FOGGED DUST POURCH RAIL. WINDOW. SO I SAW A RED STREAK DROPPING OUT OF SKY MERTICLE DROP I LOOKED WITH BIG SCOPE COULDN'T GET IT ON SO GOT THE 20. x 50 Bin. looked it over three big light spots each side, BUT NO AIROPLANE. ALSO SO I GOT OUT MY CAMERA TOOK A FEW; AND THEN GOT DRE SED GOT MY SELF ANOTHER LOOK IT WAS BELOW MY NEIGHBORS HOME IN BACK THEN WENT OUTSIDE WITH SMALLER SCOPE I HAVE IN LIVING ROOM AND LOOKED IT OVER BELOW THE edison pole 110 ft back of my home, so it looked like a saucer coming in globe of light BUT VERY GREEN SHADING ON TOP. AT APPROX 6.15 IT DID AN E WITH OUT CENTER E. later after 6.30 it was a streak also made like a plant ( WIBLOWS THEY CALL THEM IN ARIZONIA. then at last look thru scope in home it was a horizional streak, later with 7 x 50 in car it was just round globe as with naked eye. the moon was to right of it but it made a stready streak up sky. to the south east of moon and last seen at approx 7.45 way above moon. A qui de droit. Ce rapport concerne l'observation d'un objet non identifié.

J'ai hésité longtemps avant de vous transmettre l'observation qui suit. En tant que professeur de physique et astronome je suis sensible au ridicule qui entoure souvent l'observation de tels phénomènes. Je pense dependant qu'il est de mon devoir d'ajouter cette pièce à un dossier controversé.

Le 20 juin 1973 je me trouvais à Cap St-Ignace, ché Montmagny, sur le terrain de M. Henri Bernier, dans le 3 ème rang du nord-pat. A 20h.15 heure locale j'ai aperçu un objet dans le'ciel plus brillant que Vénus et plus gros à l'oeil nu. Cet objet se trouvait à 30° environ à l'ouest du nord et à 30° au-dessus de l'horizontale. Il ne pouvait s'agir de Vénus car cet objet était complètement en dehors de l'écliptique. 4. Avec des jupelles 10 x 50 an pouvait voir très nettement la forme de cet objet. L'objet avait une forme en delta avec des contours très nets. L'éclat était métallique. J'ai pu obsrrvar cet objet durant deux heures. Durant tout ce temps il est demeuré exactement au même endroit et dans la même position inclinée par rapport à l'horizontale. Cette position expliquait sa brillance car il se trouvait à réfléchir les rayons du coleil dans ma direction. Le soleil s'est couché très rouge mais l'objet a conservé le même éclat jusqu'à 22h.15. A ce moment il a commencé à rougir, devenant de plus en plus sombre, puis il a disparu sans changer de place. Ce changement de couleur était manifestement du au fait que le soleil s'est couché à 10h.15 à l'endroit où il se trouvait l'objet. Un calcul sommaire permet de situer cet objet dans la région de Chibougameau et à une altitude de l'ordre de 100 milles. Le diamètre apparent de cet objet à une telle distance exige des dimensions de plusieurs centaines de pieds. Plusieurs personnes dont les noms suivent on pu observer ce phénomêne et leur témoignage pourra corroboter le mien. Ce sont: M. Henri Bernier M. Fidele Tardif, Mme Gabrielle Tardif, Mme Alphonse Tardif, M. Gaston Guimont et plusieurs autres. Je n'ai pu prendre aucune photographie faute

d'équipement adéquat. Le diagramme ci-dessous illustre la position de l'objet et sa forme.

Soleil

Con for file.

1e 29 mars, 1974.

M. Alphonse Tardif, 9 Mgr Gosselin, Lévis, P.Q. 06V 5Kl

Cher M. Tardif:

En réponse à votre lettre du 17 mars au sujet d'une observation d'un objet non-identifié, je voudrais vous communiquer les résultats d'une petite investigation.

La direction de votre observation, 30° à l'ouest du norde, passe par Roberval, Québ ec. Depuis plusieurs années, des scientifiques americains y font des experiences utilisant de gros ballons, "SKYHOOK", pour élever des instruments dans la haute atmosphère. Roberval est ce qu'on appelle un "point conjugué". Elle a les mêmes coordinates magnetiques dans l'hémisphère du nord qu'un observatoire americain antarctique dans l'hémisphère du sud.

Ces ballons sont grands d'environs 250 - 300 pieds et peuvent atteindre de hautes altitudes. Ils apparaissent brillants dans les reyons du soleil couchant, et on peut les voire longtemps après le couché.

J'inclus ici une copie d'une photographie d'un de ces ballons. C'est en forme d'un oignon renversé comme le dessin de votre lettre.

J'espère que vous trouviez mes remarques comme explication rationelle de votre observation.

Veuillez agreer, Monsieur, mes salutations distinguées.

BAHLYP

RE: OBJEH: -

U.F.O. Sighting Wear Ashcroft, B. C. - 12 APR 74

(ASHCROFT DETACHMENT CASE) UNORG

N74/03/

1. While on patrol 12 APR 74 I sighted, at 0450 hours, an object that appeared as a silver ball. The object was approx. two miles north-east of Ashcroft, B. C. Object appeared to be situated above mountains in the distance. The sky at the time was clear. Object was viewed for approximately two minutes. Afterwards the object followed a north-east direction and disappeared amongst the mountains. C.F.S. Mt. Lolo was contacted by Kamloops Radio, and the sighting was recorded for information purposes although the object was not located on their radar.

To my knowledge I am the only person to see this U.F.O.

3. Copy of this report direct to Upper Atmosphere Research Section Astrophysics Branch, National Research Council, Ottawa, Ontario, ElA URS, and Kamloops Subdivision.

OBJET:

Helene Margaret MATHESON (B: 24 DEC. 55) U.F.O. Sighting Brookfield, Col.Co., N.S. 8 MAY 74

On 8 MAY 74 a complaint was received at the office stating that Hiene Margaret MATHESON (B: 24 DEC. 55) of Brookfield, Col. Co., N.S. sighted an Unidentified Flying Object. MATHESON was interviewed and the following information supplied as per OPP Man. - CO - NRC.

- (A) Sighted at approx. 10:15 10:30 P.M. 7 MAY 74.
- (B) Sky was cloudy.
- (C) The observer was near the old weigh scales in Brockfield, Col. Co., N. S.
- (D) Nil.
- (E) Subject stated it was very bright, like the headlights of a car.
- (B) Subject stated that all she could see was the bright lights with no colour.
- (G) Unable to tell due to the brightness of the lights.
- (H) Observed object for abot ten minutes.
- (I) No sound.
- (J) Object first sighted approx. 100 yrds. over her vehicle. It then travelled off to her right toward Trure.
- (K) There were no other umusual observations.

May 21, 1974, the following report was given over the phone to Meteor. Centre.

Date: May 21, 1974

Time : 00:00 Z

Location: Luskville, P.Q.

Observer: Mr. James N. Williams,

Luskville, P.Q. .

Observation: Object was seen over Ottawa; came from east heading west
then took a southerly direction. It was bright, a brilliant
silver; looked like a round dot. ratio of length to thickness
that of a DC 9, but had no wings. Their was no vapor trail
and it lasted 1 to 2 min.

# YOYAL CANADIAN MOUNTED POLICE - GENDARMERIE ROYALE, DU CANADA

June 1974 SUB-DIVISION - SOUS-DIVISION 74-7778-3 P.C.R. First Here Kamloops OBJET Everett Bernard MERRSMAN (DB: 3 December 1951). Unidentified Flying Object - Sighting By 28 May 1974 Kelowna, B. C. (KELOWNA DETACHMENT CASE) ORG.

# 28 May 1974

- At approximately 3:15 a.m., of the above date, MERRSMAN contacted the Kelowna Detachment advising he had seen an Unidentified Flying Object at about 1:00 a.m. He stated he had first contacted the airport to ascertain if any aircraft were in the air and also C.K.O.V. radio station.
- I Attendance was made at MERRSMAN's residence at this time, by the writer and a statement was taken from same and a copy attached hereto. subject did not appear to be under the influence of alcohol or drug. Further conversation with

MERRSMAN revealed that the objects appeared to be hovering over the City and looked 20 - 40 ft. in diameter. They were a creamy white in color and gave off a very strong light. The objects hovered for approximately 30 seconds and then appeared to vanish. There were no other witnesses to this occurrence and no other complaints received by this Detachment.

- Checks were made with the Kelowna Airport and they advised that no aircraft were in the air at 1:00 a.m. to their knowledge. They stated that the last one in was approximately 12:00 midnight. MERRSMAN has no criminal record and has had no previous sightings of this nature. The weather conditions at the time were clear.
- The National Research Council Meteor Centre, Ottawa, was advised of this sighting via our telex Kel 1173/55.
- At the time of the interview with MERRSMAN he appeared very sincere about this occurrence. It is felt by the writer that this individual could be considered reliable but that the possibility of something else making the images he saw is likely.

- (a) 11:00 p.m.; 16 May 1974.
- (b) Clear night.
- Mary OSBOURNE, Blaketown, Newfoundland. (c)
- In her home in Blaketown, Newfoundland. (d)
- Effie & Stella OSBOURNE, Blaketown, Newfoundland. (e)
  - (f) Bright orange ball of fire, with reddish orange smoke trailing behind. Size about 10" - 12" in diameter.
  - (g) Approximately 2 .- 3 minutes.
  - Investigation was carried out by Whitbourne (h) R.C.M.P. Detachment. Witnesses were contacted and a similar description was given by all three persons. A patrol was made by car and on foot of the area where the sighting apparently seemed; to disintegrate. No traces of the flying object were found. One possibility was that the Local Youth Militia were in the area and were apparently using 'Dummy Bombs' that are bright orange in colour and give off reddish smoke when ignited. No further information could be obtained to explain this item. The investigation by this Detachment is therefore being concluded. Object sited over Dildo Pond, Blaketown, Newfoundland.

Occurrence No. File No. - Dossier No. Incident No. 74-4-00-74

Date & Houre	- Details - Détails
1:50 a.m.	Mr. and Mrs. ROOME of 4530 - 6 Avenue, Edson, Alberta reporte
16 JUN 74-	they were observing unidentified objects moving from west to
	east across the sky.
	The objects appeared as bright stars, moving very rapidly
	taking 2 to 3 minutes to disappear. Each new sighting
	occurred approximately 3 to 5 minutes apart. At one point
	there were two visible at the same time.
	The sky was clear and bright at the time of the sighting
thing,	The ROOME's watched them for about 2 hours, Mr. ROOME took
XII	several pictures with a 600 mm lense on his camera.
	For the purpose of this sighting the credibility of

B, SCATTERED CLOUDS. TEMPERATURE 51. WIND NORTHEAST AT 6 MPH. C. HIGHWAY NR 10 SOUTH, OPPOSITE TRUCK ROUTE, ONE MILE SOUTH

OF YORKTON, ON, WEST SIDE OF HIGHWAY.

D, E. F. G. H. I. J. (ALL LEFT BLANK AND EXPLAINED IN (K). THE FOLLOWING REPORT WAS RECEIVED FROM R.C.M.P. YORKTON, SASK. ROY MACKENZIE GRAVES FROM 19 RIVERVIEW BAY, YORKTON, SASK. BORN 29TH MARCH 1952. EMPLOYED BY SASK POWER WAS DRIVING HIS DADS 1972 OLDSMOBILE CUTLASS AND HAD STOPPED TO TURN AROUND ONE MILE SOUTH OF YORKTON WHEN HE SAW WHAT LOOKED LIKE AN ORANGE FIREBALL EXPLODE. AFTER THE EXPLOSION HE SAS WHAT LOOKED LIKE A LONG HUNK OF WIRE AND APPEARED TO BE 15 TO 20 STREAMERS BREAKING LIKE FIREWORKS ABOUT 20 FEET ABOVE GROUND. IT LASTED FOR ABOUT 5 SECONDS APPROXIMATELY 30 OR 40 FEET AWAY. THERE WAS AN ORANGE COLOR METAL-LIKE SPRAY WHICH STRUCK THE WINDSHIELD OF THE CAR AND WITHIN SECONDS TURNED SILVER IN COLOR. THE CAR ENGINE WAS RUNNING AND WINDOWS UP IN THE CAR AND THE EXPLOSION STILL SOUNDED LIKE A LARGE FIRECRACKER. TWO SMALL FIRES STARTED IN THE GRASS AND WERE STAMPED OUT. THE FIRE WAS A BRIGHT ORANGE IN COLOR. THERE WERE TWO STREAKES OF SILVER LIKE METAL QUITE BRITTLE ON THE WINDSHIELD, COUPLE STREAKS ON RIGHT REAR WINDOW, AND TWO OR THREE STREAKS ON BACK WINDOW. ON RIGHT SIDE OF BUMPER A HOLE WAS BURNT THROUGH THE PLASTIC PANEL BETWEEN THE BUMPE AND HEADLIGHT RIM ABOUT I INCH IN DIAMETER. THERE WAS SILVER LIKE METAL AROUND HOLE SAME AS ON THE WINDSHIELD AND SCORCHED BLACK, ALL AROUND THE HOLE, UNQUOTE.

THIS INFORMATION WAS PASSED TO YOUR REPRESENTATIVE MR JOHN V HODGES IN REGINA, SASK, BY THE R.C.M.P. THE R.C.M.P. ARE CONTINUING THEIR INVESTIGATION AND HAVE TAKEN SAMPLES OF THE GRASS FIRE AND METAL LIKE SUBSTANCES ON THE CAR WHICH WILL BE TAKEN TO THE RCMP LAB IN REGINA ON MONDAY FOR ANALYSIS. MR JORN HODGE WILL BE PRESENT DURING THESE EXAMINATIONS

On July 29, 1974, the following report was given over the telephone to Meteor Centre:

Date: July, 28, 1974.

Time: 05:30 EDT

Place: At home ( in the house)

Observer: Mrs. Ashby,

.23 Dayton Crescent,

Ottawa, Ontario.

Observation:

A light was comming toward the observer. It came closer then turned; it was low in the sky. It floated over Trend Village. It was coming from the West and turned South West It lasted 5 minutes at the most. There was no sound ( the observer was in the house.

On July 30, 1974, the following report was given over the phone to Meteor Centre:

Time: 10:30 P.M. EDT. July 25, 1974
Place: MacDonald's Corner, Ontario.
Observer: Mr Mrs. Reynolds Faraday
352 Whiteby Ave.,
Ottawa, Ontario.

### Observation:

As they got out of the car, they noticed as if the tree was on fire. He got the binoculars and it seemed to have the shape of a pyramid. As he went toward it, it backed up, then went away in waves. It lasted 5 min. The ground in front of the tree is matted down for a 8-foot diameter.

CANADIAN MOUNTED POLICE

240 Bank Street, Ottawa, Ontario.

"A" DIVISION

GENDARMERIE ROYALE DU CANADA

YOUR NO.

OUR NO. 74A-400-47

August 6, 1974.

from July :

Upper Atmosphere Research Section, Astrophysics Branch, National Research Council, Ottawa, Ontario. K1A OR8

Dear Sir:

Please find attached report concerning a reported Unidentified Flying Object.

Investigation revealed that a bright new star in the South may have been thought to be an Unidentified Flying Object.

Yours truly,

J.U.M. Sauvé Superintendent,

Officer In Charge, Criminal Investigation Branch.

### ROYAL CANADIAN MOUNTED POLICE - GENDARMERIE ROYALE DU CANADA

Unidentified Flying Object Rockcliffe Park, Ontario

### 28 July 1974

- 1. At approximately 10:30 p.m., this date a telephone call was received from Mr. Lucien HOTTE of 72 Brodeur Street, Hull, P.Q. reporting the sighting of an U.F.O.
- 2. Witnesses to this sighting were his wife and daughter who saw same in the vicinity of Rockcliffe Park. Mr. HOTTE referred to the U.F.O. as being very bright, round in shape and changing place slowly in a gradual speed. The duration of observation was at least fifteen minutes, under clear sky conditions.
- 3. Upon receipt of the above information, a telex message has since been forwarded to the National Research, Meteor Centre, Ottawa under number 11 routine, 29 July 1974.
- 4. Enquiries conducted on Mr. Lucien HOTTE revealed that he is an independant realator working out of the Hull, P.Q. area. He could add nothing further in regards to the above and simply reported the incident as being an unknown experience to him. His wife confirmed the sighting and it is felt that subject is a reliable witness.
- A check with the Stol Aircraft Tower, located in the area of the sighting, put forth the explanation that the sighting could have possibly been wing lights from a small plane. The control tower also stated that there was a new bright star in the South, so bright that they thought it was an aircraft at first.

### 31 July 1974

A check was made this date through Mrs. C. CHENIER of the National Research Council Meteor Section, Ottawa, Ontario. She confirmed the fact at this time that there had been a bright star in the south around the time of the sighting. One further possibility put forth was that the object could have been a weather testing device. Also it has been proven in the past that the wing lights mentioned above often resemble an unknown object. This is due to the fact that the planes path often shews the lights clearly as long as the plane stays on the same flight path as the viewers eyes. However, when the planes path changes the light automatically disappears.

## NON-METEORITIC SIGHTING

NATIONAL RESEARCH COUNCIL

UAR/REED

CAN YOU THINK OF ANYTHING FUNNIER. FOUND THIS IN A UFO MAG. THOUGHT IT MIGHT GENERATE SOME FORM OF DISGUST AND LAUGHTER.

An unusual five-ship UFO-formation was sighted in Langenburg, Canada, by Edwin Fuhr. Canadian Royal Mounted Police are convinced, on the basis of their preliminary investigation, that some objects did land on Fuhr's farm.

# Mysterious UFO Formations Found In Canada

"I went out about 9 a.m.," reported Edwin Fuhr of Langenburg, Saskatchewan, Canada. "It was very cold and I had on my coveralls with the hood of my parka over my head. Ice crystals were falling, and it was raining at the time.

"I was going very slowly when I noticed the object in front of me. At first I thought it was a goose blind for hunters.

"I jumped out of the swather (combine) and I walked up to within 15 feet of it. I noticed the object was rotating, spinning (clockwise) and the grass around it was moving.

"I stopped right there and viewed it for maybe two minutes. I don't know exactly how long I was standing there and instinct told me not to go any closer so I backed out all the way back to the swather, walked around it and got in on the left-hand side.

"As I sat down in the seat; four more appeared on the opposite side of me and I immediately froze. I couldn't move at all and they sat there about 15 minutes, rotating, all five of them."

Fuhr added, "Then they went straight up, all even, in a step formation. They were up about 200 feet when a dark gray vapor appeared from the bottom Iwo exhaust ports and lasted a few seconds. Then they were gone."

Fuhr returned to his farmhouse, about 140 yards away. Realizing something was wrong, his wife asked him why he was upset. Fuhr related the frightening experience. Later in the afternoon, his brother and sister-in-law came over and the incident was again brought up.

When his brother returned to town, he called the Royal Canadian Mounted Police and asked if they had received any reports of anything unusual.

At first, Constable Ron Morier said he was skeptical of the incident but agreed to investigate the following morning.

However, after arriving at the site, Morier stated, "Once I saw the rings, and how genuinely scared Mr. Fuhr was, it was most definite something had landed. Nothing could have been brought into that area. There were no tracks. It came out of the sky and went back to the sky.

"Mr. Fuhr is very sincere and a responsible member of the community that members of the force have known for the past four years."

A complete report of the incident was torwarded to the National Security Council in Ottawa. Fuhr further described the details of his sighting to officials.

"It was about 5-feet high and 11-feet in diameter. It was stainless steel, saucer-shaped, domed, dark on the bottom like it had been hot, very hot. There were no markings on the craft."

After the five objects disappeared Mr. Fuhr said he "got off the swather to see if the spots were warm or hot. They were cool, all five of them. I do not know if they were sifting there all night or not."

While no occupants were observed, Fuhr added. "It looked like something got out, as the grass was trampled down near one of the rings."

Investigation of the rings by Constable Morier resulted in the following preliminary findings:

Five rings were arranged in a horseshoe design, with three of the rings only about 5 feet apart. Two additional rings on each side were further back.

The grass was approximately 18 inches high, with the strange tramping down appearing to come from one of the rings in the center cluster.

While investigating, Morier smelled the grass in the rings and noticed no odor of any kind.

Another ring was found in the area the following Tuesday morning rand many residents reported strange lights in the sky.

### UNIDENTIFIED FLYING OBJECTS

i. Hr. 20HH telephoned this Office wendering whether or not our Office had received any calls reporting sightings of unidentified flying objects. I advised Hr. 20HH that no such reports had been received. Hr. 20HH then reported that he had just spoken to his brother-in-law Edwin FUHR (B: 28 APR 38) on the telephone and he related to him how at around 10:30 A.M. today he came upon five (5) 'saucer shapped' objects while swathing rape at the above location. He apparently from with fear and watched the 'Saucers' for approx. 15 min. as they hovered about a foot off the ground. Finally he got off the Tracter and walked towards the 'Saucers' coming to within 20 ft. of them before they propelled straight up disapearing into the clouds. Hr. 20HH of course was skeptical as was I of the above story, however he advised that his brother-in-law is a responsible person and not prone to making up stories. Mr. 20HH also spoke to his father-in-law who returned to the scene of the sittings, and he confirmed that there were five definate circular patterns left in the swamp grass.

A 2. As it was dark at this time there was no point in patrolling to the scene. Arrangements were made to accompany Mr. ZOHN to the scene first thing temorew morning.

S.U.I.

(G.A.G) Opl.

(R.L. Morier) Cat.

3. 2 SEP, I went to the scene with Mr. ZORN where we spoke with Edwin FUHR and examined the circular patterns left by the "Saucers". There were five different distinct circles, caused by something exerting what had to be heavy air or exhaust pressure over the highgrass. The grass was flattened in a ejeckwise circle with the flattened portion being approx. 18 in. The total dismetr of two of the circles was 12 ft., with the other three being approx 10 ft. in dismetre. The grass in the centre portion of the ring was standing, and appeared untouched. Photographs were taken of trings. FUHR stated that he was so involved with swathing in the rape, which was a good 3 ft. tell, that he didn't notice one of t "Saucers" located in the sunken dried slough in the field until he was about 50 ft. away from these. He described the "su cars" he being about 4 or 5 ft. in height. The body was a highly polished

MR.L. OLIVER 214 BRYDGES, ST. STRATFORD. ONT. N.5A 185.

Aug. 25, 1974.

Den Sir, -Between 9:30 P.M and 10.00 PM at a line of south westery to host easterly (roughly) I have seen a moving man-mide object (presumably). It must be pretty light as expect is laid to accertain also movement unthat the aid of stars, is barely noticeable.

Plie is with the maked eye. (546HTLY STRATFORD)? Could you tell me about it, singe, leight expeed and purpose, etc., when put in orbit! Illanhing you in advance your Siverel Oliver are there any others or at present?

National Research Council of Canada/ Conseil national de recherches du Canada

Mr. L. V. Olivier, 214 Bryden St., Stmatford, Ontario, N5A 185

Dear Mr. Oliviers .

Thank you for your letter of August 25, which arrived in my office recently.

The description of the object which sighted leads me to believe that what you saw is a satellite. I cannot tell you which one itmis, nor itse orbit or when it was put in orbit because we do not have information on the many dosens of satellites which are in orbit. Host of these are American or Russian. I do not know where you could obtain this information readily.

Sincerely,

00

(Hrs.) Golombe Chemier, Heteor Centre.

N71/0051

On August 28, 1974, the following report was received, by phone, at Meteor Centre:

Time: 09:30 pm EDT

Date: August 23, 1974

Place Lake Simon

Observer: Mr. P. Halonen,

- Planning and Development, PO Tel: 8-4358

Observation: The object was sighted 320 South of Jupiter. It was brighter then Jupiter, same colour as Jupiter and the size of Jupiter. It was round and it was stationery. It lasted for 10 minutes then went out jus as though someone had turned a switch.

He was in a cance with his sister and brother-in-law on Lake Simon, P.Q.

RE: OBJET:	Unidentified Flying O Report of - Gander International Gander, Nfld. 10 OCT	Airport,	o	

#### 10 OCT 74

- 1. On the above date, at approximately 10:45 p.m. (Atlantic Time) a report, of a possible sighting of an Unidentified Flying Object (U.F.O.) in the Central Newfoundland area, was made to the Gander Airport Detail office.
- 2. The sighting in question, was made at approximately 10:10 p.m., (Atlantic Time) by one John BREEN, 74 Edinburgh Ave., Gander, Nfld. BREEN, a three year veteran as an Air Traffic Controller now employed at the Gander Air Traffic Control Center, was at the time of the sighting flying a Cessna Aircraft, Canadian Registration C-GLCF. BRHEN was flying at an altitude of approximately 5,000 feet and experiencing clear skies with occasional cloudy periods and was returning to Gander, Nfld., from Deer Lake, Nfld. When approximately 40 miles north-west of Gander, Nfld., BREEN, along with his only passenger sighted the possible U.F.O. Janice GOULD, 19 Balbo St., Gander, Nfld., BREEN's passenger and girl friend, first sighted the Object just as they had passed over the town of Grand Falls, Nfld., a small town situated approximately 60 miles west of Gander, Nfld.
- The Object was described by BREEN as being a solitary greenish, aluminous light. When first noticed by BREEN, the light was directly below BREEN's aircraft at an altitude of approximately 3,000 feet. BREEN's first interpretation of this greenish light was that his starboard aviation light may have been reflecting on something below. He then turned off all of his aviation lights for a moment; nevertheless, the greenish light continued directly below the aircraft. BREEN, at this time, along with GOULD, attempted to determine whether or not the greenish light was part of a bigger unlighted mass; however, this met with negative results as nothing but the greenish light could be noted.
- A. BREEN further stated, that at this time, the Cessna was travelling at a speed of approximately 134 M.P.H., and that the greenish light could, and did at times speed up and remain some distance ahead of the aircraft, still at approximately 3,000 feet. This greenish light would then slow down and allow BREEN to once again get directly above it. The light would then continue to slow down more, and as a result lag some distance behind and then go back to it's original position below BREEN's aircraft. BREEN's observation period of this greenish light lasted approximately 25 minutes.
- S. When approximately 5 to 6 miles north-west of Gander, Nfld., BRHEN contacted the Air Traffic Control Center and advised them of what was taking place. Controllers, at the Air Traffic Control Center, then attempted to pick up this object on their radar screen. One Robert LAWRENCE, the supervising controller on duty at the time, advised that a target was picked up by their 6 mile radar; however, the object remained on the screen for only two sweeps of the radar needle. The target did not show up on the screen as an aircraft. The target did, however, indicate while on the screen that its course had now changed from a north-west course to a westerly course and that the reason it could no longer be picked up on radar was that it was now believed to be flying at tree top level. Continued attempts to regain contact with the target on radar net with negative results. BRHEN, upon arriving over the Gander area, circled his aircraft in an attempt to further identify the object; however, upon circling, all traces of the CONTINUED ON PAGE TWO

CONTINUATION - SUITE

E. OBJET.

Unidentified Flying Object (U.F.O.), Report of -Gander International Airport, Gander, Nfld. 10 OCT 74

PAGE

### greenish light were gone.

- Continual attempts to further identify the greenish light in question by both the Air Traffic Controllers and BREEN met with negative results. LAMRENCE, upon losing all contact with the target on radar, contacted the authorities connected with the Early Warning defensive system at Goose Bay, Nfld., and notified them of the incident.
- 7. Upon the landing of BREEN's aircraft at Gander International Airport, both BREEN and GOULD were immediately contacted. It was noted at this time, that neither BREEN nor GOULD appeared to be under any sort of influence, from either alcohol or a drug. Their accounts of the incident are neither exaggerated nor are they dramatized and both BREEN and GOULD appear to be of a mature and responsible nature.

#### 11 OCT 74

- 8. On this date, at approximately 4:45 a.m. (Atlantic Time) another report, of a possible sighting of an Unidentified Flying Object in the Central Newfoundland area, was once again made at the Gander Airport Detail office.
- This apparent sighting, was made at approximately 4:15 s.m. (Atlantic Time) by the Captain as well as by the Co-Pilot of a DC-8 jet liner. The aircraft in question, was "Capital Airlines" jet, bearing American Registration N-490C, and at the time of the sighting the aircraft was descending in order to land at Gander International Airport for a technical stopover. The weather at this time, was once again clear with occasional cloudy periods. The DC-8 was flying at an altitude of approximately 7,500 feet and cruising at a speed of 290 miles per hour, proceeding in a westerly direction.
- The object, in this case, was described by the Captain as well as by the Co-Pilot as being an object, of undistinguishable shape or size, flashing red and white lights. The object apparently pulled alongside the DC-8 jet liner and continued on a parallel course with the aircraft. This sighting lasted for approximately 5 to 7 minutes. When the aircraft was approximately 5 miles west of Gander, Nfld., the object in question, still travelling alongside the DC-8, entered a somewhat small cloud formation, and disappeared. The object in question, was further described as being able to keep up to DC-8, and at times would speed up slightly, just shead of the DC-8, and then would return back alongside the aircraft.
- Both the Captain and the Co-Pilot stated, that in their opinion, the object was not an aircraft. Edward DUHANY, the supervising controller on duty at the time, advised that no other aircraft were reported to be in the area at the time of the incident. DUHANY, further stated, that their radar monitors, at the Gander Air Traffic Control Center, did not pick up any other targets except the descending DC-8. DUHANY, once again contacted the Early Warning defensive system at Goose Bay, Nfld., and notified the authorities at that point of the above.

BCMPAIRPT GNDR OCT 10 UNCLASSIFIED R.C.M.P. GANDER AIRPORT DETAIL TO: NATIONAL RESEARCH COUNCIL METEOR CENTRE N74/077

RADIO RECORDS M-80

INFO: C.O. 'B' DIVISION GANAIR 109 ON THE 10 OCT. 74, AT APPROXIMATELY 10:10 P.M. (ATLANTIC 34 MET) A POSSIBLE UNIDENTIFIED FLYING OBJECT (U.F.O.) WAS SIGHTED IN THD CENTRAL NEWFOUNDLAND AREA. SKY CONDITIONS AT THE TIME, WERE CLEAR WITH PARTLY CLOUDY CONDITIONS. THE OBJECT IN QUESTION WAS SIGHTED BY ONE JOHN BREEN, C/O AIR TRAFFIC CONTROL, GANDER CENTER, GANDER, NEWFOUNDLAND. BREEN ATHE TIME OF THE SIGHTING, WAS FLYING A CESSNA AIRCRAFT, CANADIAN REGISTRATION C-GLCF, AT AN ALTITUDE OF 5,000 FEET, AND FLYING BETWEEN POINTS FROM DEER LAKE, NFLD., 98TO GAN DER. NFLD. BREEN'S POSITION WAS APPROXIMATELY 40 MILES NORTH WEST OF GANDER! NFLD. BREEN WAS CARRYING ONLY ONE PASSENGER AT THE TIME, HIS GIRLFRIEND, WHO'S NAME WAS NOT AVAILABLE AT THIS TIME. SHE APPARENTLY WITNESSED THE OBJECT ALSO. THE SIGHTING WAS DESCRIBED AS BEING A GREENISH ALUMINOUS LIGHT, AT AN ALTITUDE OF APPROXIMATELY 3,000 FEET. THE LIGHT IN QUESTION WOULD SHOOT AHEAD OF THE AIRCRAFT, AND THEN SLOW DOWN AT WHICH TIME THE AIRCRAFT WOULD CATCH UP TO PP. THE LIGHT WOULD THEN EITHER FOLLOW THE AIRCRAFT SOME DISTANCE BEHIND, 94 0)6 843:8060R FLY DIRECTLY UNDERNEATH. THE LIGHT WOULD THEN SPEED UP AND PASS THE AIRCRAFT AGAIN. ONLY ONE OF THESE GREENISH LIGHTS WERE SIGHTED, THE OBSERVATION PERIOD LASTED FROM FIRST SIGHTING; 10:10 P.M. TO 10:35 P.M.

25 2000

IT SHOULD BE NOTED, THAT AIR TRAFFIC CONTROL, UPON RECEIVING NOTIFICATION OF THE OBJECT FROM BREEN, ATTEMPTED TO LOCATE THE OBJECT ON RADAR. BY THIS TIME, BREEN WAS APPROXIMATELY 5 TO 6 MILES NORTH WEST OF GANDER. -JIR TRAFFIC CONTROL. BY UTILIZING THEIR 6 MILE RADAR PICKED UP A TARGET FOR ONLY 2 SWEEPS OF THEIR SCREEN. 'HYE OBJECT WAS NOT IDENTIFIED AS AN AIRCRAFT. AT THIS TIME, THE OBJECT CHANGED COURSE FROM A NORTH WESTERLY DIRECTION TO A WESTERLY DIRECTION. ATTEMPTS BY AIR TRAFFIC CONTROL TO REGAIN RADAR WITH THE OBJECT MET WITH NEGATIVE RESULTS. AS THE OBJECT WAS FLYING AT TREETOP LEVEL AND WAS TO LOW FOR RADAR CONTACT. BREEN AFTER FIRST SIGHTING THE OBJECT HAD MADE SEVERAL ATTEMPTS TO IDENTIFY THE OBJECT BUT ALL HAD MET WITH NEGATIVE RESULTS. IT SHOULD BE NOTED THAT BREEN WAS TRAVWLING AT A SPEED OF 134 M.P.H., AND THAT THE OBJECT IN QUESTION COULD EITHER GO PASS THE AIRCRAFT, OR SLOW DOWN OR GO SLOWER THAN THE AIRCRAFT. AIR TRAFFIC OFFICIALS AT THIS POINT. DO NOT BELIEVE THE OBJECT TO BE AN AIRCRAFT. IT SHOULD ALSO BE NOTED THAT BREEN FIRST BECAME AWARE OF THE OBJECT JUST AS HE HAD PASSED GRAND FALLS, NEWFOUNDLAND, WHICH IS A TOWN JUST BETWEEN DEER LAKE, NFLD., AND GANDER, NFLD.
