

Tasker JT4-073-90 (23 Jul 90)

Target: S/V [REDACTED] 42 feet long (NFI).

EEI:

1. Where is the vessel?
2. Is it carrying drugs?
3. What is its destination?
4. Provide any associated names/callsigns/etc.

Feedback on JT4-073 (23 Jul 90)

OOG: 231000L

SG1A

The vessel known as [REDACTED] is currently located at 21 N - 84 W, just below the far western border of Cuba at the Yucatan Channel. It is carrying some cocaine and will travel into the Gulf of Mexico. The final destination of the vessel is 30 N - 88 W, near Mobile, Alabama. Call signs include: HTG, H8ES, HG3, and 113G.

SG1A

00B: 231013L Jul 90

The [REDACTED] is presently located in a harbour which contains other vessels and port facilities, at approximate location 2515N/7830W. There are drugs aboard, made to look like a personal "stash", but in extremely pure form. They are presently waiting for an unknown (to them) buyer to contact them. The on-board operation is performed on a 2-man basis, with one person ready at all times to "flush" the drugs, in case of a bad deal, or interdiction. The individual-dose-sized packets are wrapped in water-soluble "paper" which will allow the rapid destruction of the evidence, in case the drugs must be "flushed".

SG1A

OOD: 231130L July 90

The vessel [REDACTED] is currently located at 10 55'N 75 40'W. It is not carrying drugs at this time, but it has carried drugs in the past. Its destination is a port along the northern coast of Colombia, near 11 20'N 73 45'W. Possible associated names and/or call signs are [REDACTED]
